Character Creation

Character creation in Breathe and Live simple.

First players must decide their 6 base stats. There are multiple methods to finding their base stats, though they all work equally well.

Second, players decide their fighting style. There are two options from the get go, between using breathing techniques as a swordsman or eating demon flesh with demonification. This can be a very tough decision as it does affect how battles are fought for the rest of the campaign.

Third, players add flavor text to explain their time spent training. These details are not essential for gameplay but do very much so help the character writing aspect.

Fourth and finally decide, using a set number of points, whether the player can decide their extrasensory abilities, superhuman features or max out learning all of their breathing technique forms.

After all this is done character creation is complete.

Rolling

Rolling in the Breath & Live system is similar to other popular tabletop roleplaying games. Players use a d20 everytime and add their skills and abilities to the appropriate rolls. The only stark difference comes in the form of separating the *base* skills and *derived* skills.

Base skills are the larger of the two sets of numbers, made up of 6 base stats, which are all given modifiers players use during rolls that equal the total of the base stat minus one. The only bonuses supplied to these rolls with base stats are typically given from extrasensory abilities or superhuman features.

Derived skills are, more simply, used for roleplay scenes outside of combat. These bonuses to a players d20 rolls come from the total of their derived skill, adding any bonuses from clothing, equipment or otherwise noteworthy skills.

Determining Health, AC and Reactions

Health Points work fundamentally the same for every character, every swordsman starts out with a base 20 health. The only time health permanently increases is during ranking increases or when acquiring health improvements through training.

Stamina is determined by $(20 + \text{Fortitude})$
Stamina is used to perform Breathing Forms and use Total Concentration Breathing. If a Swordsman reaches 0 Stamina they are forced to recover for a turn and cannot attack, if the player cannot make a recovery breathing for 2 rounds after hitting 0 they lose consciousness.

Player **AC** is determined by $[10 + \text{Speed}]$

The starting number of **Reaction Points** is determined by $(5 + \text{Speed} + \text{Smarts})$. Reactions function as your safeguard to instant death, using a reaction points players can dodge, attack, reload, or whatever else players have unlocked whenever they wish during combat. Reactions recover fully during rest.

Deciding Base Stats

Force	Used as a basis for strength. Anything that requires a strong body can call for a force check. <i>Examples include;</i> Lifting, Throwing, Carrying, Striking with force, pressing, hitting or even swinging.
Finesse	Used as a basis for the bodies ability to be dexterous, agile and light footed. <i>Examples include;</i> Long Jump, Gymnastics and feats of being acrobatic. This extends to sword control and ability to swing properly.
Fortitude	Used as a basis for physical wellbeing and the ability to shrug off damage. <i>Examples include;</i> being poisoned, eating toxic material, adapting to new conditions and being hit with extreme force.
Speed	Used as a basis raw speed and quick thinking. A very small use skill that can really shine in the right conditions. <i>Examples include;</i> Dashing, feats of athleticism in quick succession or moving to one target after another.
Social	Used as a basis for anything that requires a silver tongue. <i>Examples include</i> Charming, lying, interrogating, distinguishing truth from lie or even convincing fall under this stats guide.
Smarts	Used as a basis for anything intellectually challenging. <i>Examples include;</i> perceiving, understanding, investigating, putting clues together, general and medical education as well as understanding.

To decide a players base stats, there are two main methods that provide the quickest and easiest methods for fairly attaining your beginning stats. **Rolling;** Players roll a D6 and assign each roll to a base stat. Players who choose to roll can assign the numbers after rolling 6d6 die or may choose to assign a number each time they roll their d6 die.

Assign Numbers; Assign these numbers to stats (0,1,2,3,3,5) though players starting at higher ranks may adjust the numbers accordingly.

Each base stat is given a modifier of the each stats total minus one.

Derived Stats

While not useful for combat, derived stats provide a plethora of help to players in non-combative or hostile situations. Players, after creating their base stats, will then move to designate their derived stat numbers. Derived stats given a point pool of their base stats, meaning the more points players have in a base stat the better their derived become. Derived stats, though not used for rolls in combat, do provide some benefit, with basic attacks gaining a bonuses to damage from derived stats like *Raw Power* and *Accuracy* helping with basic slashes and gunfire.

Force

- ❑ **Athletics** - Ability to jump long distances, run in a dash, carry heavy objects, parkour, etc.
- ❑ **Raw Power** - Inherent strength of the body from genetics or training, your bodies physique.

Finesse

- ❑ **Dexterity** - Ability to move and act nimbly.
- ❑ **Balance** - Ability to maintain stability both physically and mentally.
- ❑ **Accuracy** - Ability to aim and be precise with tools.

Fortitude

- ❑ **Mithridatism** - Ability to resist common and uncommon poisons.
- ❑ **Endurance** - Ability to remain steadfast.
- ❑ **Tolerance** - Resistance to non-poison bodily threats such as food, alcohol and drugs.

Speed

- ❑ **Reaction Time** - Ability to react to any sudden stimuli.
- ❑ **Agility** - To move, jump or dive with balance and poise.
- ❑ **Swiftness** - Your sleight of hand, quick feet.
- ❑ **Cunning** - Sneakiness, stealth or ability to hide.

Social

- ❑ **Deception** - Ability to deceive or trick through lies, bluffs or pure guile.
- ❑ **Performance** - Ability to entertain, act or put on a scene.
- ❑ **Intimidation** - Ability to instill fear or intimidation in others.
- ❑ **Perception** - Spatial and social awareness.
- ❑ **Intuition** - Innate insightfulness to places, people or situations.

Smarts

- ❑ **Medicine** - Medical knowledge of the human body and medicines.
- ❑ **Nature** - Knowledge of topography, biology, geology, et cetera.
- ❑ **Science** - Scientific nature of chemicals, physics, engineering, et cetera.
- ❑ **Investigation** - Ability to see unseen clues or hints.
- ❑ **Survival** - Your ability to meet basic human needs, finding food, finding water, shelter, et cetera.

Flavor Text (Trainer)

Using 3 new points, decide who your swordsman studied under and how you did in training. As well as what they were left with.

Your Cultivator's background was...		
A Regular Swordsman	As a Former Hashira	As a Current Hashira
0pts	1pt	2pts

In your training you...		
Struggled, taking longer than normal	Had an average year	Were talented
0pts	1pt	2pts

Your Cultivator sent you into Final Selection with...		
No identifying garb	A subtle piece of identifying garb	An instantly identifiable look
0pts	1pt	2pts

Flavor Text (Partner)

Using 3 new points, decide who your swordsman's companion kasugai crow and their possible traits.

How does your kasugai crow feel about you... ?		
Dislikes your swordsman	Likes your swordsman	Loves your swordsman
0pts	1pt	2pts

It's about your crow... it's...		
An older crow.	A younger crow	Isn't even a crow?!
0pts	1pt	2pts

If it's not a crow it's a... (1d12)		
Sparrow	Crane	Vulture
Hawk	Blue Jay	Canary
Eagle	Owl	Heron
Flamingo	Albatross	Peacock

Kasugai Crow

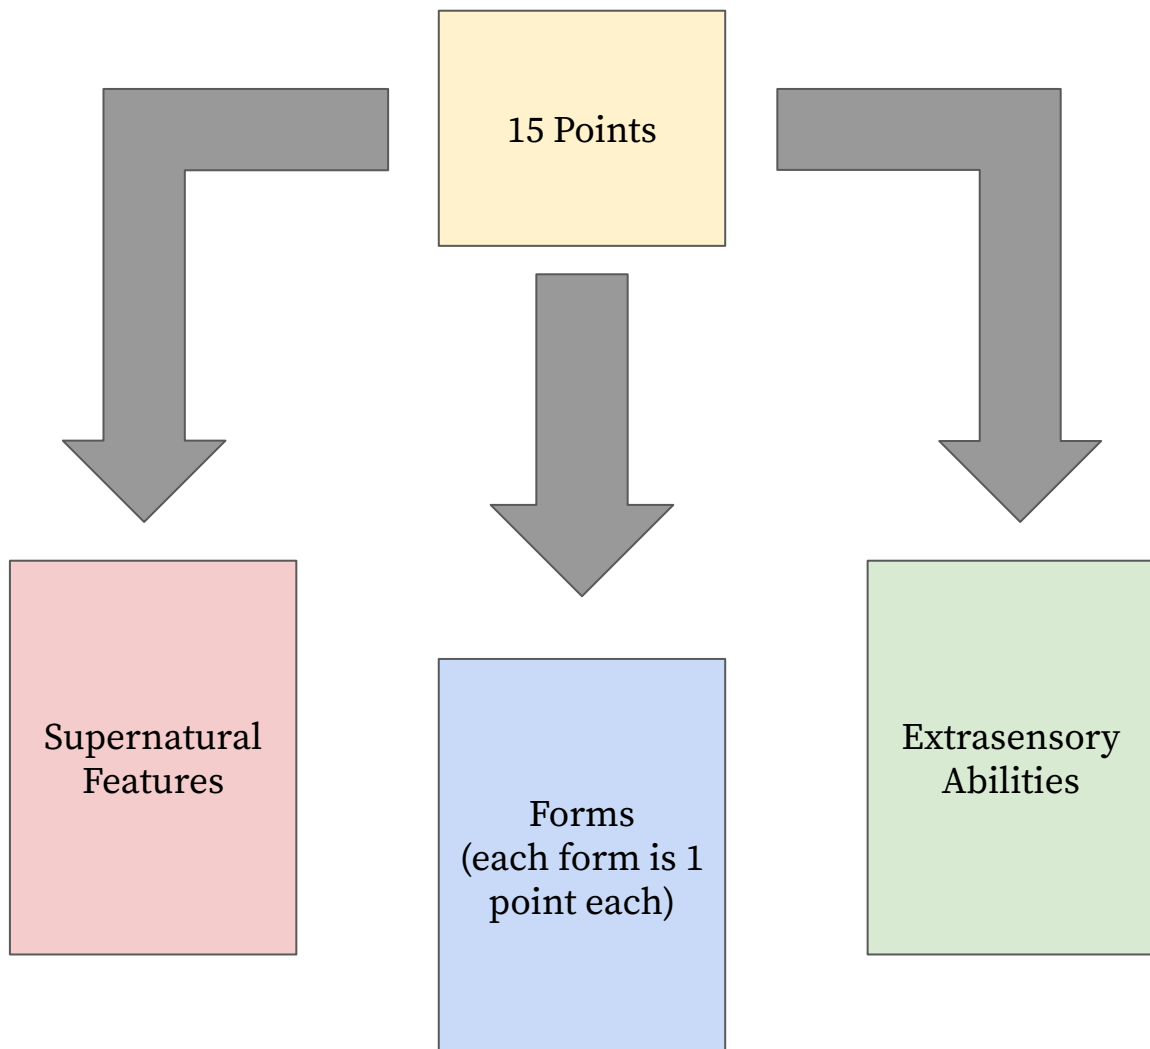

Kasugai crows or whatever birds assigned from the corps to aid swordsman in their journeys. These few commands that can be given to crows or other birds that they can do for players at any time.

Kasugai crows have 1 health, 3 AC and can perform 1 action in combat.

Retrieve Small Item	Your crow will retrieve a small item of your description to the best of their ability from the surrounding area.
Deliver Message (Short)	Your crow will almost instantaneously deliver a shortly worded message or note to a desired nearby location, person or entity.
Deliver Message (Long)	Your crow, over the course of a single session, will transport a message to a desired far off location, person or entity.
Carry Item	Your crow will carry a small item that you produce for a disclosed amount of time or until set conditions are met.
Search For -----	Your crow will actively search for a requested item of your desire, bringing it to you if the item is small enough or guiding you to a location requested.

Starting Abilities

Using 15 points in a point buy system, assign your swordsman supernatural talents, forms and super physical traits!

Extrasensory Abilities

Each Extrasensory Cost 3 Points to add to your sheet and can only be upgraded by studying. You can study these abilities up to 2 times, gaining up to 3rd level which grants you an even greater ability.

Taste:

Level 1: Players gain a +3 to any sense check involving their sense of taste.

Level 2: Players have a +4 to sense checks and can detect demons within 30ft without an ability check.

Level 3: Players have a +5 to sense checks, 60ft of detection and gain the ability to gauge the stats of any demon whose flesh you consume or taste.

Touch: .

Level 1: Players gain a +3 to any sense check involving their sense of touch.

Level 2: Players have a +4 to sense checks, and can detect demons within 30ft without an ability check.

Level 3: Players have a +5 to sense checks, 60ft of detection and gain the ability to tell how many stamina, reaction and blood demon points a target has simply by touching them.

Smell: .

Level 1: Players gain a +3 to any sense check involving their sense of smell.

Level 2: Players have a +4 to sense checks, and can detect demons within 30ft without an ability check.

Level 3: Players have a +5 to sense checks, 60ft of detection and gain the ability to detect a demon's level by being within radius of them.

Hearing: .

Level 1: Players gain a +3 to any sense check involving their sense of hearing.

Level 2: Players have a +4 to sense checks, and can detect demons within 30ft without an ability check..

Level 3: Players have a +5 to sense checks, 60ft of detection and gain the ability to detect specific health points of humans and demons by being within radius.

Sight: .

Level 1: Players gain a +3 to any sense check involving their sense of sight.

Level 2: Players have a +4 to sense checks, and can detect demons within 30ft without an ability check..

Level 3: Players have a +5 to sense checks, 60ft of detection and gain the ability to predict what move 1 demon will take at the start of the round no matter the level of the demon so long as they are within radius.

Superhuman Features

Hard Body Parts: Players choose a body part or area of their body that grants them +2 AC. This feature also grants a -8 to damage dealt to this specific body part. Options include: Either arms, leg, chest, back or head

Point Cost: 2

Eight Fold Muscles: Players gain a massive boost to muscle giving them a +3 in Force in combat scenarios and a plus +6 to Raw Power at all times.

Point Cost: 3

Flexible Body: Players gain an incredible boost to muscle and body flexibility granting them a +3 to finesse in combat as well as a +6 Dexterity at all times.

Point Cost: 3

High Intellect: Players gain a +3 to smarts checks during combat, as well as now being able to add +3 to all of their smarts derived stats at all times.

Point Cost: 3

Medical Training: Players are able to automatically heal 1d6+2 without need of a medical check, so long as they have bandages or other medical equipment on hand.

Point Cost: 3

Firearms Training: Players with firearm training are able to use their turn to automatically succeed an attack using guns against a target that hasn't used a reaction point.

Point Cost: 3

Spirit: Players with real spirit can surpass their ruling, allowing them to use 1 final breathing form, even if they don't have the required stamina, once per encounter.

Point Cost: 1

Resistant Blood: Poison from low ranking, high ranking and lower moon disciple rankings has no effect on this player.

Point Cost: 5

Prodigy: Players who take prodigy can learn skills from higher ranks 2 levels earlier than others. . Along with this Prodigy's unlock the ability to practice and master Sun Breathing forms.

Point Cost: 8

Iron Stomach: Allows the player to gain another die of blood demon points by consuming demon flesh.

Point Cost: 4

Prerequisite: The player taking this skill must be a demonification user.

[Feat Name]: Description

Point Cost:

Human Capabilities

Human Capabilities

These are capabilities shared amongst all classes, any player can perform them.

Attacking: All players can use their action to attack a target with whatever abilities they have available.

Item Usage: Players may use items during their turn as an action. Items may have prerequisites, though as long as the prerequisite doesn't require more than a turn, they can make whatever checks necessary as their action.

Hold: Holding an action allows the player to do as they wish but simply farther down the turn order.

Movement: The player may move their full movement speed during their turn, before or after using their action for the turn.

Dashing: Players can choose to forgo their action and dash for an extra 30ft of movement.

Dodging: When being targeted for an attack, a player can forego using a reaction point and risk taking damage for a finesse based dodge. If the dodge succeed by beating the attack roll, the player can move anywhere with their full movement and take no damage. Failing a dodge check disallows you from using a reaction point against the incoming attack.

Reaction Point Usage: Players have a pool of "reactions" they can draw from. Reaction points emulate the split second, live saving movements slayers have to make to survive demon encounters. Reactions can be made during anyone's turn at any time and priority goes to those who use the reactions are use most recent.

Back Up Requests: Anytime a player believes the threat level far exceeds their own skill level, a special emergency code will allow for them to call in higher ranked swordsman with haste.

Crow Instruction: Kasugai crows have long helped demon slayers, these birds are trained to respond to any of the requests they've been taught as seen on their page.

Item Requests: During missions there are intervals of time laid out during the mission briefing. These intervals are for item deliveries that can be called in to the corp mansion in which Kakushi will deliver a set number of items requested should the slayer have the authority to request them. Certain items are only allowed to be requested a set number of times per mission depending on your rank.

Driving: Players have the ability to drive or pilot any vehicle. Operating the vehicles may come with hazard checks requiring players to making rolls depending on the hazard.

Resting: Players can rest between battle to regain stamina.

React Point Usages

Reaction Points: Reaction points (RP) emulate the split second reaction time slayers must possess to survive from and dispose of demons. There are several different reactions that can be unlocked over the course of a campaign but players start out with the simple dodge react.

Regaining RP: Players cannot regain RP until resting for a full 8 hours.

Multiple Point: Players can choose to either use one or two points for every type of reaction. One point will activate the use of the move, typically for a single person or on the self. Using two points is most common when the reaction is being used to help another player or when the player does not want the move to fail.

*Unlocked with skills

Quick Draw React	
1	Using 1 Point(s) will allow a player to switch weapons without taking an action.
2	Using 2 Points will allow you to attack with said weapon and swap back to your previous weapon.

*Unlocked with skills

*Players start with Dodge React

Dodge React	
1	Using 1 Point(s) will automatically dodge any 1 incoming attack.
2	Using 2 Points will allow you to pull any one (1) target along with you.

Attack React	
1	Using 1 Point(s) will allow an attack even out of turn, whenever used.
2	Using 2 Points will guarantee a hit, even if the enemy uses a dodge point.

Medical React	
1	Using 1 Point(s) automatically succeeds a medicine check or activates a healing item upon a target
2	Using 2 Points will allow players to heal the maximum amount from a healing item OR automatically succeed a medicine check.

Heal React	
1	Using 1 Point(s) automatically roll to heal equal to the highest rank of demon blood consumed
2	Using 2 Points will heal similarly to one point usage, though it won't be rolled as the healing will be the maximum amount allowed by the die.

*Unlocked with skills

*Demonification Only

Basic Attacks

Basic attacks unlike breathing forms do not automatically hit and must roll to hit using a d20 and land on or higher than their targets AC. These d20 rolls are accompanied by a *force* or *finesse* bonus, the whatever not chosen being added to the damage as a bonus. Basic attacks do not cost any stamina.

Be advised, though the damage of a basic attack seems rather weak in comparison to breathing techniques, basic attacks can instantly kill a fully grown human.

Firearms require a *finesse* check against a targets AC, though when targeting objects it uses *accuracy* instead. During combat firearms **add** their accuracy into their damage.

Unarmed

Unarmed | **1d4+Force** |

**Range for any unarmed attack is 5ft*

Blades

Nichirin Blade - Standard | **1d6** |

**Range 5ft*

Trench | **(3d6)** |

**Range 50ft*

Action Economy

Action Economy

Action

An action in combat represents the core of a player's turn and can be used to perform attacks, skill checks, or other maneuvers. Each player gains 1 action for every 10 points in their Speed stat.

Reaction

Reaction points allow players to respond to dynamic situations during a round, whether to strike, evade, or assist. These points can be spent at any moment within the round, giving players the flexibility to defend, counterattack, or act when opportunities arise as long as players have reaction points left.

Movement

Players have a standard movement range of 30 feet, which can be used before or after their action. Attacks or actions can be taken at any point within the movement phase, giving players full control over their positioning during combat.

Non-Attack Actions

These are a set few actions that are not attacks but still require a full action to enact such as:

- Swapping weapons
- Reloading
- Coating Weapon
- Crafting
- Commanding your crew

Slayer Swordsman Class

- Recovery Breathing
- Demonification Class
- Skill Enhancement
- Demon Flesh Consumption

Bonus Actions

Actions that can be done during your turn at will that effect your character but do not cost a full action. Items, abilities, etc, will be labeled as bonus action if they do not require a full action.

Combat

Effects

Bodily Effects

Bleed

The target loses 1d4 health from bleeding every round. Bleed can be cured with recovery breathing* or bandages. *with tcb:constant

Burn

The target receives 1 point of fire damage every round.

Encased

Target is trapped within a blood demon art and are unable to make any moves until they are freed (or the prerequisites of the blood demon art are met.)

Freeze

A targets limb or body becomes unusable for 1d4 rounds.

Feral

The target is unable to act of their own will and attacks any target within range with basic attacks.

Poisoned

Targets take a reduced stats or take damage equal to the strength of the poison every round.

Paralyzed

Targets are unable to move but may still speak.

Slowed

The target is only able to use one action every other turn.

Sensory Effects

Anosmia

The target automatically fails perception checks requiring smell.

Ageusia

The target automatically fails perception checks requiring taste.

Blinded

The target automatically fails perception checks requiring sight.

Controlled

Targets are relinquished control of their body by a blood demon art.

Charmed

The player is not only unable to harm the charmer they're charmed by, but they also perceive enemies of the charmer as their own enemies.

Deafened

The target automatically fails perception checks requiring hearing.

Grief

Targets struck with grief are overwhelmed by guilt and must succeed a DC 15 Endurance check.

Numb

The target automatically fails perception checks requiring touch.

Off Balance

The target is unable to use reaction points for the remainder of the round.

Smoke

Those infected with smoke lose -1 stamina per round, per stack afflicted. At 10 stacks, those afflicted lose consciousness. Smoke can be cleansed with recovery breathing being used in clear air.

Cursed

Targets of the curse are subjugated to the rulings of a curse until they are dead or until the curse is removed. This ranges from health depletion to stat reduction or even markings for death after a set number of rounds depending on the casting demon.

Surprised

When a target is caught off guard at the start of combat, they lose their first turn at the start of combat.

Dismemberment

Dismemberment, as a function, allows demons and humans to shift the tides during battle. For humans, the ability to disable demons is almost expected, it's one of the few ways the playing field can be levelled. For demons however, it's a wonderful way to bully weaker opponents and truly make them suffer.

Removing a limb or any body part will almost always inhibit the mechanics of both demons and humans. These are done by targeting specific body parts during your attacks and dealing a set number of damage to them in one attack.

Limbs and their appendages will have health usually equal to roughly 10% - 20% of an enemies total health, meaning players must deal that set amount of damage in one go for the limb to be removed, that is, only for demons however. Humans can have their limbs removed even if the targeted limb takes damage over several rounds.

How to read

- ❑ [Limb] [HP Percent Ratio]
 - ❑ Effect

Human Dismemberment

- ❑ Arms [20% Total Health]
- ❑ Legs [20% Total Health]
 - ❑ 1 Leg: Halved speed
 - ❑ 2 Legs: Speed set to 0
- ❑ Sensory Dismemberment
 - ❑ Ears [5% Total Health]
 - ❑ Tongue [5% Total Health]
 - ❑ Eyes [5% Total Health]
 - ❑ Nerves [5% Total Health]

Demon Dismemberment

- ❑ Head [<20% Total Health]
 - ❑ Death
- ❑ Arms [20% Total Health]
 - ❑ Halved damage with arms.
- ❑ Legs [20% Total Health]
 - ❑ Halved movement.
- ❑ Wings
 - ❑ Flight Disabled.

Choosing a Class

Choosing Classes

Slayer Swordsman

Fighting Style

Players who play as swordsman are able to choose from a varied selection of breathing styles with a slew of options for close, mid ranged or long ranged combat.

Playing as a Swordsman however, means healing options are extremely *limited* and require resting time. Though swordsman put out far more damage, their sustainability is lacking.

Focus

Players who play these classes, most of the time should focus on finesse, force or speed.

Demonification

Fighting Style

Players who take the demonification class are looking at a much more up close and personal fighting style, eating demon flesh and going toe to toe with these monsters. Their healing is also varied fantastically and they can even come back from lethal wounds. For what they lack in damage they make up for ten fold in sustainability.

Demonification users also scale to their opponents level of strength, meaning that no matter how strong an enemy may seem, a demonification slayer can meet them at their level.

Focus

Players who play demonification should focus heavily on their fortitude and force.

Demon

Fighting Style

Demons have a wealth of playstyles in this system, though they directly only descend from one of 12 different variants, they may contain a mix of any. These twelve classes are based on the 12 named moons found in the modules. Many of these moons use varied methods of attack and thusly have various blood demon arts.

A demons main focus if they are not a human consumer, is consuming other demons to regain power.

Focus

Demons have no major focus, going from short to long ranged, effect focused to damage focused, light weight or tank-like.

Kakushi

Fighting Style

Kakushi don't technically have a *fighting style* per say, but they can provide support in incredible ways when combat does initiate. Many kakushi can carry support items such as wisteria perfumes, demon blood syringes, and more to use on demons or slayers in combat to shift the tides.

Many subclasses of kakushi however focus heavily on out of combat skills to prepare or secure the health of slayers when not in direct combat.

Focus

Kakushi focus heavily on supporting slayers and protecting citizens. They are not vital to combat but their presence can more often than not make or break a deadlock.

Slayer Swordsman Class

Slayer Swordsman

Class Level Up

Level 1 Mizunoto	<i>STARTER RANK</i> All starter abilities and stats.			
Level 2 Mizunoe	+1 to a Base Stat	+3 Health	+1 Slot to Study	+5 Stamina

Level 11 Hashira	+10 Reactions	+3 Health	All forms get +2 to damage die	³⁴ +15 Stamina

Slayer Swordsman

Class Information

Slayer Swordsman Class Abilities

Stamina acts as a pool of energy slayers draw from to activate both TCB and following breathing technique forms, which are the main weapons that slayer swordsman have against their demon foes. Stamina pools are increased every level and can be further increased with food and abilities gained later. Players can sleep to recover it or take actions to use recovery breathing.

Total Concentration Breathing (TCB for short) is the key to using many of the Slayer Swordsman class techniques, required to use breathing technique forms. Each round players have it active requires 1 stamina point until mastered (See TCB:C)

Breathing Techniques are incredibly hard to learn techniques that use total concentration breathing to activate. These attacks automatically hit their target unless dodged and do midlingdamage, though easily upgradeable, all while costing stamina to activate.

Recovery Breathing is an action that can be taken during a round that allows a player to recover 1d8 per rank of Stamina. You cannot do it while using Total Concentration Breathing.

Starting items:

Breathing Technique Weapon

Handgun of Choice

Either: (2x)Bandage (1x) Wrapping OR (1x) First Aid Kit

Breathing Techniques

Breathing Techniques

Breathing Techniques and their forms can be learned at the start of every character. Each character can site a trainer or practitioner of their desired breathing technique, these mentors can even range from book guides, real people and even hashira NPCs available in game.

- Breathing Techniques will automatically hit. Unless a demon uses a reaction point to avoid it. Otherwise there is no need to make a check against AC, breathing forms will always land.
- Breathing Techniques cost stamina. Breathing forms eat away at a players stamina and if they aren't careful can cause players to pass out or become incapacitated if they hit 0 Stamina.
- Breathing Techniques, at least in this system-- not in canon, actually do produce elemental effects, but this is more so for flavor and roleplaying.

Breathing Techniques (Out of Combat)

Using techniques out of combat is a great way to destroy rubble or remove debris.

Learning Techniques (Post Character Creation)

If a player chooses to use a studying slot to learn a new technique they must find a way to learn it. Whether they find a guide to a new technique via a book, find a teacher or listen to a record with an audio guide, it doesn't matter. These new techniques will be learned in full and come with all the new forms, though it will take awhile to completely master it.

Breathing Techniques (Canon)

Breathing Form

How to read breathing form data sheets

Basic description of the styles moves and what it's common personality traits shared amongst users.

1	Form Name	Form Description
2	Form Name	Form Description
3	Form Name	Form Description
4	Form Name	Form Description

Special Abilities given by learning all of the forms of the breathing style.

Style Requirements

Senses required |

Weapons required |

Reading Form Lists

Form #	Form name	Form Description	Stat Used	Stamina Cost	Range	Damage
-----------	-----------	------------------	--------------	-----------------	-------	--------

Breath of The Sun

Sun breathing is without question, the most powerful breathing technique created. Users of this technique perfect slashes, slices and all manner of sword skill. The visage of bright flames, hotter than the sun, created by this form strike such fear in demons it may cause them to fly into a panic. Users of this technique often give off an aura of overwhelming intensity and, oddly enough a radiating kindness.

Style Requirements

Sense | None

Feats | **Prodigy**

Weapons | Nichirin Katana

1	Dance	The user performs a singular downwards vertical slash in an arcing motion.
2	Clear Blue Sky	The user spins and twists their upper body in a circular motion, releasing a 360° slash.
3	Raging Sun	The user unleashes two consecutive horizontal arcing slashes around themselves to strike incoming attacks.
4	Burning Bones, Summer Sun	The user performs a singular slash utilizing a spiraling motion which extends in front of themselves to defend from imminent frontal attacks.
5	Setting Sun Transformation	The user backflips into the air before performing a singular horizontal slash which aims to decapitate the target.
6	Solar Heat Haze	The user rushes forth, now attempting to deliver a strike seemingly enveloped in a heat-haze, masking the true length and location of the blade to deliver an unexpected strike.
7	Beneficent Radiance	The user spirals into the air whilst performing a swirling slash upwards to strike the target.
8	Sunflower Thrust	The user performs a singular thrust utilizing the tip of their blade to strike the target.
9	Dragon Sun Halo Head Dance	The user assumes a high stance, before unleashing a number of consecutive slashes in a fluid motion in the form of a Japanese dragon made of solar flames. This technique is capable of decapitating multiple targets at once.
10	Fire Wheel	The user flips into the air behind the opponent before unleashing a singular vertical slash in a circular motion to swiftly cut the target in half.
11	Fake Rainbow	The user performs high-speed twists and rotations, creating afterimages that are primarily used for evading attacks. These afterimages are particularly effective against enemies with sharp vision.
12	Flame Dance	A two-strike combo which starts with a downward vertical slash leading into a horizontal slash right after.
13	Thirteenth Form	The user continuously performs all twelve forms of Sun Breathing in repetitive succession to increase the accuracy and agility of its movements, and attacks.

Special Ability | Chosen

Those who've master Breath of the Sun find stamina costs halved for all forms, as well as damage tripled damage during marked form. Along with these abilities, Breath of Sun users no longer choose study skills but instead learn TCB:Constant at start, Marked form during their first moon fight, See Through World and Red Blade when they solo defeat a moon level demon.

Sun Breathing is too large

information

Breath of The Moon

Moon breathing, in reflection of Sun breathing, is equally as beautiful and devastating. Users practice powerful swings that emulate that of a crescent moon. Users are commonly solo fighters, though will on occasion battle with others. This is due to their more aloof and distant attitudes.

Weapons | Nichirin Katana

Moon	1	Dark Moon, Evening Palace
Moon	2	Pearl Flower Moongazing
Moon	3	Loathsome Moon, Chains
Moon	4	Fourth Form: Veiled Moon, Phantom Dust
Moon	5	Moon Spirit Calamitous Eddy
Moon	6	Perpetual Night, Lonely Moon - Incessant
Moon	7	Mirror of Misfortune, Moonlit
Moon	8	Dragon Ringtail
Moon	9	Waning Moonswaths
Moon	10	Drilling Slashes, Moon Through Bamboo Leaves
Moon	11	Hollow Moon
Moon	12	Drought Sky Cleaving Moon
Moon	13	Still Horizon Burial
Moon	14	Catastrophe, Tenman Crescent Moon
Moon	15	Veil of the Last Moon
Moon	16	Moonbow, Half Moon

Special Ability | Not Chosen

Users of Moon breathing experience far greater boosts to their abilities when fighting alone. When engaged in combat alone against 1 or more demons, players gain an extra damage die to all breathing techniques.

							3d6 + Finesse
Moon	1	Dark Moon, Evening Palace	The swordsman draws the blade in a wide crescent arc, then sheaths it in a single motion, releasing a chaotic spread of crescent-shaped blades along the curved path.	Finesse	10	15ft	Ranged *Can be used from Melee range to allowed distance
Moon	2	Pearl Flower Moongazing	The swordsman draws the blade in a wide crescent arc, then sheaths it in a single motion, releasing a chaotic spread of crescent-shaped blades.	Finesse	10	10ft	3d8 + Finesse
Moon	3	Loathsome Moon, Chains	The swordsman executes two massive forward sweeps, unleashing a flurry of minor crescent blades behind each stroke.	Force	5	15ft	2d8 + Force
							1d12 + Finesse
Moon	4	Fourth Form: Veiled Moon, Phantom Dust	The swordsman thrusts forward in a narrow arc, generating a crescent moon blade that travels in a focused, piercing line. This form is designed to penetrate armor or pierce through multiple targets in a row.	Finesse	1	10ft	Straight *Must move in 1 direction
Moon	5	Moon Spirit Calamitous Eddy	The swordsman layers overlapping crescent slashes in a spiral motion to form a rotating vortex of moon blades. Can be used stationary or with forward momentum to engulf opponents.	Force / Finesse	11	5ft - 20ft	3d8 + Force/Finesse
Moon	6	Perpetual Night, Lonely Moon - Incessant	The swordsman repeatedly slashes the air in rapid succession, generating a near-constant barrage of moon blades that travel several meters forward.	Force	14	15ft	4d8 + Force
Moon	7	Mirror of Misfortune, Moonlit	The swordsman delivers a frontal crescent slash, triggering a burst of both straight and curved moon blades that expand outward in a fan.	Finesse	7	10ft	3d6 + Finesse
							1d20 + Force/Finesse
Moon	8	Dragon Ringtail	The swordsman swings in a high arc, sending a powerful long-range slash that trails numerous moon blades along its path.	Force / Finesse	13	25ft	Ranged *Can be used from Melee range to allowed distance
Moon	9	Waning Moonswaths	The swordsman strikes repeatedly in close proximity, layering slash upon slash in an unrelenting sequence. Each swing is meant to slightly overlap the last.	Force	1	5ft	1d12 + Force
Moon	10	Drilling Slashes, Moon Through Bamboo Leaves	The swordsman creates three rotating slashes, like saw blades, each surrounded by crescent moon waves.	Finesse	5	15ft	2d8 + Finesse
							1d6 + Force/Finesse
Moon	11	Hollow Moon	The swordsman twists their body in a mid-air spiral, lashing out with a web of crescent arcs in all directions.	Force / Finesse	7	20ft	Deflector / Negator *Removes incoming damage
Moon	12	Drought Sky Cleaving Moon	The swordsman performs a sharp rising diagonal cut, creating jagged moon blades.	Force	9	20ft	1d20 + Force
							2d8 + Finesse
Moon	13	Still Horizon Burial	The swordsman sweeps low in a seamless, horizontal motion, sending razor-thin blades skimming across the terrain. The blades remain soundless invisible.	Finesse	8	20ft	Ranged *Can be used from Melee range to allowed distance
Moon	14	Catastrophe, Tenman Crescent Moon	The swordsman creates an expanding ring of slashes from a central point, sending crescent blades in every direction. Each wave increases in size.	Force	18	30ft	2d20 + Force
							4d8 + Force/Finesse
Moon	15	Veil of the Last Moon	The swordsman releases a sequence of slowing slashes, each one trailing longer than the last, before ending in a silent final arc.	Force / Finesse	19	25ft	Ranged *Can be used from Melee range to allowed distance
							3d20 + Finesse
Moon	16	Moonbow, Half Moon	The swordsman swings upward, generating six curved blades that crash downward in a scattered arc. The resulting impact leaves deep craters.	Finesse	16	30ft	Charge Time *Requires 1 round to charge **Being attacked interrupts charge

Breath of Flame

Flame Breathing is a very uniquely powerful breathing technique. Users preferring strong single strike techniques that reflect that of roaring fire. Swordsman using this technique are usually outspoken and audacious people.

1	Unknowing Fire	The swordsman charges towards their opponent at high speed and decapitates them in one or multiple slashes.
2	Rising Scorching Sun	The swordsman uses an upward moving slash attack.
3	Blazing Universe	The swordsman slashes their sword in a horizontal stroke which brings them close to the ground.
4	Blooming Flame Undulation	The swordsman spins his sword in a circular motion, deflecting his enemies attacks. Any damage aimed at you is deflected and passed on to the target of your choice during the round.
5	Flame Tiger	A series of sword slashes that take on the form of a tiger. The technique carves a deep impression in the ground.
6	Raging Blaze	The swordsman brings their blade down from above their head in a powerful, full body slash.
7	Purifying Flame	A passive resting stance to gain back stamina equal to how much damage the enemy has dealt in the past turn.
8	Flurry of Dancing Flame	The Swordsman uses a circular footwork pattern to evade and deflect multiple enemy attacks whilst slashing several times.
9	Rengoku	A devastating dashing slash initiated from a high stance.

Special Ability | Blazing Heart

Players have the ability to once per day, double the damage of all attacks dealt during the chosen round of combat. Players who use multiple attacks with reaction points may use this boost as long as it the attacks are made in the same round it is activated. This ability goes on cooldown immediately after use.

Weapons | Nichirin Katana

1	Unknowing Fire	The swordsman charges towards their opponent at high speed and decapitates them in one or multiple slashes.	Force	2	5ft / Melee	3d6 + Force
2	Rising Scorching Sun	The swordsman uses an upward moving slash attack.	Finesse	3	5ft / Melee	1d20 + Finesse
3	Blazing Universe	The swordsman slashes their sword in a horizontal stroke which brings them close to the ground.	Force	9	5ft / Melee	4d8 + Force
4	Blooming Flame Undulation	The swordsman spins his sword in a circular motion, deflecting his enemies attacks. Any damage aimed at you is deflected and passed on to the target of your choice during the round.	Finesse	4	5ft / Melee	1d12 + Finesse Deflector / Negator *Removes incoming damage
5	Flame Tiger	A series of sword slashes that take on the form of a tiger. The technique carves a deep impression in the ground.	Force	11	30ft	2d8 + Force Ranged *Can be used from Melee range to allowed distance
6	Raging Blaze	The swordsman brings their blade down from above their head in a powerful, full body slash.	Force	10	5ft / Melee	2d20 + Force
7	Purifying Flame	A passive resting stance to gain back stamina equal to how much damage the enemy has dealt in the past turn.	Force / Finesse	0	5ft / Melee	1d8 + Force or Finesse Regenerator *Regenerates Stamina
8	Flurry of Dancing Flame	The Swordsman uses a circular footwork pattern to evade and deflect multiple enemy attacks whilst slashing several times.	Finesse	11	20ft	3d6 + Finesse Chaser *Cannot be reacted or dodged away
9	Rengoku	A devastating dashing slash initiated from a high stance.	Force / Finesse	16	30ft	3d20 + Force OR Finesse Charge Time *Requires 1 round to charge **Being attacked interrupts charge

Breath of Water

Water Breathing is one of the most well known techniques, easily being mastered by a variety of students. Users of this form prefer gliding singular strikes or hard hitting multi-strike moves that are reminiscent of water and its movement.

Swordsman with this technique tend to be found aloof or standoffish people.

1	Water Surface Slash	The swordsman generates enough momentum to create a powerful single concentrated slash.
2	Water Wheel	The swordsman leaps and spins vertically in the air while releasing a flowing attack in a circular motion.
3	Dance of the Rapid Current	The swordsman swings their blade at his opponent in a way that mimics the movement of waves on the surface of water.
4	Striking Tide	The swordsman makes multiple consecutive slashes while twisting their body in a flowing fashion similar to a harsh tide.
5	Merciful Rain on a Dry Day	A "sword strike of kindness" that kills the target with little to no pain. Used when the enemy surrenders,
6	Twisting Whirlpool	The swordsman fiercely twists their upper and lower body, creating a whirlpool that cuts anything caught in it. Hits every target within an area of effect, including allies.
7	Piercing Raindrop	A fast and accurate stab. The fastest Breath of Water technique.
8	Waterfall Basin	The swordsman cuts the target vertically with great force.
9	Water Splash	Minimizes the landing time and surface needed when landing, allowing the user to move without limits. Ideal when fighting in a place with no solid foothold.
10	The Dragon of Change	A continuous attack that increases in power with each rotation, creating a strong slash.

Special Ability | Deflecting Waves

Players gain the ability to use the reaction **Deflect** which allows them to move melee ranged attacks to either side of them or deflect ranged attacks in a target direction equal to the attacks range.

1	Water Surface Slash	The swordsman generates enough momentum to create a powerful single concentrated slash.	Finesse	3	10ft	3d6 + Finesse Straight *Must move in 1 direction
2	Water Wheel	The swordsman leaps and spins vertically in the air while releasing a flowing attack in a circular motion.	Force	5	15ft	2d8 + Force
3	Dance of the Rapid Current	The swordsman swings their blade at his opponent in a way that mimics the movement of waves on the surface of water.	Finesse	14	30ft	3d8 + Finesse
4	Striking Tide	The swordsman makes multiple consecutive slashes while twisting their body in a flowing fashion similar to a harsh tide.	Finesse	12	25ft	3d6 + Finesse Cleave *Hits any enemies within range
5	Merciful Rain on a Dry Day	A "sword strike of kindness" that kills the target with little to no pain. Used when the enemy surrenders,	Finesse	1	5ft / Melee	3d8 + Finesse Charge Time *Requires 1 round to charge **Being attacked interrupts charge
6	Twisting Whirlpool	The swordsman fiercely twists their upper and lower body, creating a whirlpool that cuts anything caught in it. Hits every target within an area of effect, including allies.	Finesse	6	5ft / Melee	1d20 + Force Cleave *Hits any enemies within range
7	Piercing Raindrop	A fast and accurate stab. The fastest Breath of Water technique.	Force	6	10ft	1d12 + Force Chaser *Cannot be reacted or dodged away
8	Waterfall Basin	The swordsman cuts the target vertically with great force.	Finesse	5	5ft / Melee	1d20 + Force
9	Water Splash	Minimizes the landing time and surface needed when landing, allowing the user to move without limits. Ideal when fighting in a place with no solid foothold.	Finesse	6	30ft *Ignore difficult terrain	1d10 + Finesse
10	The Dragon of Change	A continuous attack that increases in power with each rotation, creating a strong slash.	X	16	No Range Limit	3d20 + 1 For reach tile passed.

Breath of Wind

Wind Breathing is a scary set of forms, most swordsmen straying from the powerful style in fear of its skill level. Users of this form master a set of strong single or spinning strikes that mimic that of cyclones and tornadoes. Swordsmen of this style are noted for being wild or hard to talk to but determined.

1	Dust Whirlwind Cutter	The swordsman dashes forward in a cyclone of slashes.
2	Purifying Wind Claw	The swordsman lifts the sword upwards towards the right, above their head and does a vertical slash down creating four blades of wind that slashes down on the enemy like claws.
3	Clean Storm Wind Tree	The swordsman uses his arm to slash around his body to create a whirlwind around him that slices up everything in its path. Hits every target within an area of effect, including allies.
4	Rising Dust Storm	The swordsman swings his blade downwards from several directions.
5	Winter Gale	The swordsman strikes from above while falling, sharpens his focus and in a multitude of arced slashes hits the target.
6	Black Wind Mountain Mist	The swordsman strikes from the side, while rotating their body in a position to deliver an uppercut movement, creating a slashing tornado.
7	Gale: Sudden Gust	The swordsman leaps into the air while swinging their blade which generates gale-force winds to shred their opponent apart.
8	Primary Gale Slash	The swordsman leaps into the air and swings his blade which generates circular torrents of wind. An attack that can be used at range.
9	Idaten Typhoon	The swordsman backflips into the air and while upside-down, swings his blade to release a circular gust of wind.

Special Ability | Winds of War

Players gain the ability to replenish 1d2 reaction points upon decapitating a demon.

Breath of Thunder

Thunder Breathing is one of the toughest forms taught in the Demon Slayer corps. Users of this style learn a set number of iaido based slashes and slicing movement techniques that mimic lightning strikes. Swordsmen of this technique are noted for their odd behavior and immense leg strength.

1	Thunderclap and Flash	The user dashes forward and slashes at their opponent with incredible speed.
2	Lightning Ball	The swordsman is able to generate five straight attacks around the user in a single movement. After all of these attacks hit in succession they are preceded by a booming shock of 5 individual lightning strikes at the same time.
3	Buzzing Mosquito Thunder	An attack reminiscent of a spinning wave of lightning in all directions. Area of effect attack with a wide reach. Obscures friendly fire.
4	Distant Thunder	The user releases multiple ranged strikes towards a single target.
5	Heat Lightning	A single, focused, slashing attack.
6	Electric Lightning Shower	A series of strong attacks like forked lightning.

Special Ability | Lightspeed

Players gain the ability to use the reaction **Dash** which allows them to move spaces equal to their speed.

Breath of Stone

Stone Breathing is one of the more outlandish techniques taught. Users of this technique specially practice with a maul and axe chained together, slamming them down with the force of rockslides and earthquakes. Swordsman or Chain-users(?) of these techniques are noted for their immense strength and stoic behavior.

Style Requirements

Sense | None

Feats | None

Weapons | Nichirin Maul

1	Serpentine Bipolar	A move designed to cleave through an enemy by using a spinning technique surrounding the user.
2	Upper Smash	A two stage move which lands a downward attack, shortly followed by a sharp upward attack with either weapon or self.
3	Igneous Reflection	A defensive move that lets the user deflect enemy attacks with their weapon, ricocheting the attacks back to their source.
4	Volcanic Rock	A move in which the user spins their weapon at arms length to strike harshly at far distances.
5	Stone Wheel of Justice	A powerful, charged vertical spinning attack that can deal a great amount of damage.

Special Ability | Maul & Axe

Players can swap between their maul end and axe end of their weapon. Swapping takes no action.

Maul: Attacks made with maul deal their damage add a bonus +6 but cannot decapitate

Axe: Attacks made with the axe deal their damage and add a bonus +2 and can decapitate.

Switching between these chain ends is considered a bonus action.

1	Serpentine Bipolar	A move designed to cleave through an enemy by using a spinning technique surrounding the user.	Force / Finesse	6	30ft	2d8 + Axe Head Cleave *Hits any enemies within range
2	Upper Smash	A two stage move which lands a downward attack, shortly followed by a sharp upward attack with either weapon or self.	Force / Finesse	13	30ft	2d20 + Axe Head
3	Igneous Reflection	A defensive move that lets the user deflect enemy attacks with their weapon, ricocheting the attacks back to their source.	Force / Finesse	6	30ft	1d12 + Axe Head Deflector / Negator *Removes incoming damage
4	Volcanic Rock	A move in which the user spins their weapon at arms length to strike harshly at far distances.	Force / Finesse	6	30ft	1d20 + Axe Head
5	Stone Wheel of Justice	A powerful, charged vertical spinning attack that can deal a great amount of damage.	Force / Finesse	11	30ft	3d20 + Axe Head Charge Time *Requires 1 round to charge **Being attacked interrupts charge

Breath of Flower

Flower breathing is one of the most graceful breathing techniques one can master in the corps. Users of this technique practice and master careful strikes and movements, swaying and stabbing like flowing flowers. Users of flower breathing are noted for their fantastic composure and elegant way of speaking.

1	Bloom	The swordsman twirls to create a wide upwards spiral with their blade. Hits every target within an area of effect, including allies.
2	Plum Spirit	A defensive techniques that deflects attacks using rotating sword slashes.
3	Safflower Robe	A single sword slash that curves and twists
4	Peony of Futility	A graceful flurry of nine consecutive attacks that flow and weave in on themselves.
5	Swirling Peach	A technique used after or during evasion, the user spins around moving with their body weight to deliver an attack. An attack made after a drop or a spin,
6	Sakura Fall	An elegant attack dealt from above. The user descends onto the enemy with their blade poised to stab. Double rolled damage, plus finesse.

Special Ability | Blooming Focus

Attacking a single target allows you to build a stacking bonus. Whenever players continuously attack a single target they gain a +2 to damage rolls and dodge rolls involved with the target.

Style Requirements

6	Sakura Fall	An elegant attack dealt from above. The user descends onto the enemy with their blade poised to stab.	Force	13	5ft	3d20 + Force

Breath of Mist

Mist breathing is known for its indescribably beautiful slaying forms, most requiring such perfection in form and speed that they nearly disappear. Users of this style most hone almost all of their slaying abilities to actually master this technique. Thusly these users are noted for their sense of isolation and reclusivity.

Style Requirements

Sense | None

Feats | None

Weapons | Nichirin Katana

1	Hanging Sky, Distant Mist	A straightforward thrust attack that drags a mist trail behind the swordsman.
2	Eight Layered Mist	The swordsman unleashes multiple slashes one on top of the other in quick succession.
3	Demisting Blast	A single circular slash that can inflict damage, or knock away attacks. The swordsman must decided which effect they wish to use when unleashing this move.
4	Advection Slash	A quick slash from the sheathe reminiscent of an laidō technique. The move is elegant and disciplined.
5	Sea of Clouds and Haze	The swordsman charges towards an enemy attack at high speed and unleashes a flurry of slashes.
6	Moonlit Mist	The swordsman leaps high in the air and sends a series of countless ranged slashes downwards.

Special Ability | Dragging Clouds

Whenever a player uses a breathing technique they cover all tiles they pass in a misty veil. Mist breathers can in turn hide in these misty veils for doubled AC bonus. These veils disappear after an encounter ends.

1	Hanging Sky, Distant Mist	A straightforward thrust attack that drags a mist trail behind the swordsman.	Force	11	30ft	1d20 + Force
2	Eight Layered Mist	The swordsman unleashes multiple slashes one on top of the other in quick succession.	Finesse	3	10ft	3d6 + Finesse
3	Demisting Blast	A single circular slash that can inflict damage, or knock away attacks. The swordsman must decided which effect they wish to use when unleashing this move.	Force	1	5ft	2d8 + Force OR Deflector / Negator *Removes incoming damage
4	Advection Slash	A quick slash from the sheathe reminiscent of an laidō technique. The move is elegant and disciplined.	Finesse	4	15ft	1d12 + Finesse
5	Sea of Clouds and Haze	The swordsman charges towards an enemy attack at high speed and unleashes a flurry of slashes.	Finesse	15	20ft	4d8 + Finesse
6	Moonlit Mist	The swordsman leaps high in the air and sends a series of countless ranged slashes downwards.	Finesse	17	25ft	2d20 + Finesse Ranged *Can be used from Melee range to allowed distance

Breath of Serpent

Serpent breathing is well known for its quick and slithery movements, one of the most notorious for decapitating. Users practice quick and nimble movements to most easily find the neck, striking quickly with snake-like speed. Snake breathers are most known for their odd behavior, socially outcasting themselves from large groups.

1	Winding Serpent Slash	The swordsman rotates and releases a circular slash in front of them
2	Venom Fangs Narrow Head	The swordsman dashes behind the opponent and strikes at the neck. Regenerating stamina equal to the damage dealt.
3	Coil Choke	The swordsman coils their sword around the neck or appendage and slices with high accuracy.
4	Twin-Headed Reptile	The swordsman leaps forward and slashes horizontally at the target whilst flying toward them.
5	Slithering Serpent	The swordsman, using their bending sword, curves it right to left at incredible speeds. This technique is capable of decapitating multiple targets at once.

Special Ability | Loose Form

Serpent breathers cannot suffer the disadvantages from any difficult terrain, grapples, or restrictions made to slow or stop them. Any attempt made by a demon to impose these disadvantages allows the user to freely respond with an attack or dodge.

Style Requirements

Sense | None

Feats | None

Weapons | Nichirin Twisted Katana

1	Winding Serpent Slash	The swordsman rotates and releases a circular slash in front of them	Finesse	4	15ft	1d12 Finesse
2	Venom Fangs Narrow Head	The swordsman dashes behind the opponent and strikes at the neck. Regenerating stamina equal to the damage dealt.	Finesse	15	20ft	3d8 + Finesse Regenerator *Regenerates Stamina
3	Coil Choke	The swordsman coils their sword around the neck or appendage and slices with high accuracy.	Force	4	10ft	2d8 + Force
4	Twin-Headed Reptile	The swordsman leaps forward and slashes horizontally at the target whilst flying toward them.	Finesse	6	20ft	1d20 + Finesse Straight *Must move in 1 direction
5	Slithering Serpent	The swordsman, using their bending sword, curves it right to left at incredible speeds. This technique is capable of decapitating multiple targets at once.	Finesse	17	15ft	2d20 + Finesse Cleave *Hits any enemies within range

Breath of Sound

Sound breathing is, while insanely difficult to train and master, one of the most beautiful forms to use. Users practice mad swings with precisely calculated swings, as well as the art of combat explosives... Users are noted for having absolutely wild personalities with keen intellect for the arts.

1	Roar	The swordsman slams both blades together in front of themselves causing a massive explosion and dealing massive damage.
2	Ballad of Broken Bows	The swordsman slices around them in a circular rotation slicing anything within a 10 foot radius around them.
3	Prelude of a Nightmare	The slayer slashes quickly and retracts their sword with their chain in a whip like motion that immediately slices the target.
4	Constant Resounding Slashes	the slayers blades move in a blur of motion, creating a symphony of slicing sounds as they unleashes a barrage of rapid and relentless slashes. Each strike reverberates with a deafening intensity, creating shockwaves that shatter the air around them and leave their opponents disoriented.
5	String Performance	The Slayer's blades become an extension of their body as they fluidly maneuver. The metal chains connecting the blades vibrate with a musical rhythm, producing resonant tones that enhance the Slayer's movements and strikes. Their attacks are like a symphony of harmonious strikes.
6	Requiem	The Slayer's blades move in a solemn and measured manner, slicing through everything within 15ft around the slayer. Each strike carries a somber tone, producing mournful echoes that reverberate through the battlefield. The Slayer's movements are graceful yet powerful, as they channel their grief and determination into their attacks.

Special Ability | Battle Score

When a player enters combat they roll a 1d4 for every rank of the demon they're fighting and remove points equal to their **Smarts**. The final number is converted to rounds and the player has disadvantage on attack and damage rolls until their numbered rounds are up. After those rounds are up they gain advantage on all attack rolls and damage rolls made.

3	Prelude of a Nightmare	The slayer slashes quickly and retracts their sword with their chain in a whip like motion that immediately slices the target.	Force	4	15ft	2d8 + Force
4	Constant Resounding Slashes	the slayers blades move in a blur of motion, creating a symphony of slicing sounds as they unleashes a barrage of rapid and relentless slashes. Each strike reverberates with a deafening intensity, creating shockwaves that shatter the air around them and leave their opponents disoriented.	Force	7	25ft	2d8 + Force
5	String Performance	The Slayer's blades become an extension of their body as they fluidly maneuver. The metal chains connecting the blades vibrate with a musical rhythm, producing resonant tones that enhance the Slayer's movements and strikes. Their attacks are like a symphony of harmonious strikes.	Finesse	10	30ft	3d6 + Finesse
6	Requiem	The Slayer's blades move in a solemn and measured manner, slicing through everything within 15ft around the slayer. Each strike carries a somber tone, producing mournful echoes that reverberate through the battlefield. The Slayer's movements are graceful yet powerful, as they channel their grief and determination into their attacks.	Finesse	17	30ft	3d8 + Finesse Cleave *Hits any enemies within range

Breath of Insect

Insect breathing is somewhat controversial for its unorthodox slaying methods and thusly has very uncommonly weak swings. Though this is true the stabs of insect users are insanely powerful as they practice thrusts and jabs extensively. Users of insect breathing are considered some of the most cold and calculating of all the corps swordsman.

1	Butterfly Dance: Caprice	The swordsman jumps forwards towards the opponent, stinging them multiple times with the blade to inject poison.
2	Dance of The Bee Sting: True Flutter	The swordsman dashes at the target with incredible speed and delivers a single thrust strengthened by the momentum to inject the poison.
3	Dance of The Dragonfly: Compound Eye Hexagon	A six-strike-based attack where the user attacks the target in six different areas of the body in order to inject lethal poison in each area, increasing the chances of them succumbing to the poison.
4	Dance of The Centipede: Hundred-Legged Zigzag	The swordsman runs at full speed in a zigzag pattern to generate enough momentum, creating a powerful single thrust that simultaneously injects poison into the intended victim. The blinding speed and erratic pattern also serve to throw the opponent into confusion and create an appropriate opening.

Special Ability | Squash Underfoot

Attacks made against poisoned targets has advantage to hit as well as on damage. Checks to dodge made against targets who are poisoned are also doubled.

Style Requirements

Sense | None

Feats | None

Weapons | Nichirin Needlepoint

1	Butterfly Dance: Caprice	The swordsman jumps forwards towards the opponent, stinging them multiple times with the blade to inject poison.	Force	5	15ft	1d8 + Finesse Affliction *Causes Status Affect
2	Dance of The Bee Sting: True Flutter	The swordsman dashes at the target with incredible speed and delivers a single thrust strengthened by the momentum to inject the poison.	Finesse	7	30ft	1d6 + Force Affliction *Causes Status Affect
3	Dance of The Dragonfly: Compound Eye Hexagon	A six-strike-based attack where the user attacks the target in six different areas of the body in order to inject lethal poison in each area, increasing the chances of them succumbing to the poison.	Finesse	9	10ft	3d6 + Force 3x Affliction *Causes Status Affect
4	Dance of The Centipede: Hundred-Legged Zigzag	The swordsman runs at full speed in a zigzag pattern to generate enough momentum, creating a powerful single thrust that simultaneously injects poison into the intended victim. The blinding speed and erratic pattern also serve to throw the opponent into confusion and create an appropriate opening.	Finesse	18	No Range Limit	4d8 + Finesse Chaser *Cannot be reacted or dodged away Affliction *Causes Status Affect

Breath of Love

Those who witness love breathing may not be surprise to feel their heart skip a beat. The swings of their whip blade carry an astronomical amount of force as well as love, effortlessly careening through the air like metal ribbons. Users are noted for a godly amount of strength as well as warmth.

1	Shivers of First Love	The swordsman dashes forward with a series of slashes.
2	Love Pangs	The swordsman sends out an extended whipping slash.
3	Catlove Shower	The swordsman leaps and unleashes a series of ranged arced attacks in quick succession.
4	Broken Heart Reclusion	The swordsman spins their whip sword in a circular motion, deflecting all incoming attacks and dealing area of effect to all targets.
5	Swaying Love - Wildclaw	The swordsman somersaults backward through the air, creating a long whiplike string of attacks, before coiling her sword around her opponent's neck.
6	Cat-Legged Winds of Love	The swordsman twirls upside-down and creates a helical slash with their sword, deflecting incoming attacks.
7	Long Distance Love	The user uses their long sword whip to grapple or take hold of something at the swords maximum distance, from here they can choose to either hold or pull backward or decapitate their target.

Special Ability | Lovely Swings

All attacks made to against targets activate a cleaving sphere around the player for their attack range surrounding them. This does not affect allies, meaning Breath of Love users are not capable of accidental friendly fire with their weapons.

Style Requirements

Sense | None

Feats | **8 Fold Muscles, Flexible Body**

Weapons | Nichirin Whip Blade

1	Shivers of First Love	The swordsman dashes forward with a series of slashes.	Finesse	5	30ft	3d6 + Finesse
2	Love Pangs	The swordsman sends out an extended whipping slash.	Force	6	30ft	1d20 + Force
3	Catlove Shower	The swordsman leaps and unleashes a series of ranged arced attacks in quick succession.	Finesse	9	30ft	3d8 + Finesse
4	Broken Heart Reclusion	The swordsman spins their whip sword in a circular motion, deflecting all incoming attacks and dealing area of effect to all targets.	Finesse	6	30ft	1d12 + Finesse Deflector / Negator *Removes incoming damage
5	Swaying Love - Wildclaw	The swordsman somersaults backward through the air, creating a long whiplike string of attacks, before coiling their sword around their opponent's neck.	Force	2	30ft	3d6 + Force Straight *Must move in 1 direction
6	Cat-Legged Winds of Love	The swordsman twirls upside-down and creates a helical slash with their sword, deflecting incoming attacks.	Finesse	7	30ft	2d8 + Finesse Deflector / Negator *Removes incoming damage
7	Long Distance Love	The user uses their long sword whip to grapple or take hold of something at the swords maximum distance, from here they can choose to either hold or pull backward or decapitate their target.	Force	13	30ft	2d20 + Force

Breath of Beast

Beast breathing is a wild, crass and incredibly dangerous form to not only will but simply witness. Users practice intense swings, careless jabs and treacherous cleaves. Users of this style are noted for being insane.

1	First Fang: Pierce	The user stabs the target's neck with both blades.
2	Second Fang: Rip and Tear	A double slash with the users two blades in both diagonals (like an X)
3	Third Fang: Devour	Simultaneous horizontal slashes towards the target's throat.
4	Fourth Fang: Slice 'n' Dice	A multiple diagonal double slashes with both swords.
5	Fifth Fang: Crazy Cutting	A technique which slices everything in all directions.
6	Sixth Fang: Palisade Bite	A simultaneous decapitation with the users two swords from both directions.
7	Seventh Form: Spatial Awareness	The user can identify the position of enemies by feeling small disturbances in the air.
8	Eighth Fang: Explosive Rush	The user charges towards their opponent while dual wielding, then they swings their blades to decapitate the target.
9	Ninth Fang: Extending Bendy Slash	Inosuke dislocates the joints of his arm to increase the range of his attack.
10	Tenth Fang: Whirling Fangs	The user spins their swords in a circular motion, deflecting enemy attacks.

Special Ability | Dislocation

If a demon attempts to react away from an attack, the player can choose to dislocate an arm to ensure their attack does hit. This does require them to push it back into place the following turn as a bonus action.

Style Requirements

Sense | **Touch**

Feats | **Flexible Body**

Weapons | Nichirin Serrated Blades

1	First Fang: Pierce	The user stabs the target's neck with both blades.	Force	10	5ft / Melee	2d20 + Force
2	Second Fang: Rip and Tear	A double slash with the users two blades in both diagonals (like an X)	Finesse	2	5ft / Melee	3d6 + Finesse
3	Third Fang: Devour	Simultaneous horizontal slashes towards the target's throat.	Force	3	5ft / Melee	1d20 + Force
4	Fourth Fang: Slice 'n' Dice	A multiple diagonal double slashes with both swords.	Finesse	6	5ft / Melee	3d8 + Finesse
5	Fifth Fang: Crazy Cutting	A technique which slices everything in all directions.	Finesse	9	5ft / Melee	4d8 + Finesse
6	Sixth Fang: Palisade Bite	A simultaneous decapitation with the users two swords from both directions.	Force	9	20ft	1d20 + Force
7	Seventh Form: Spatial Awareness	The user can identify the position of enemies by feeling small disturbances in the air.	X	1	30ft	Extends or Grants Extrasensory Touch for 30 Feet
8	Eighth Fang: Explosive Rush	The user charges towards their opponent while dual wielding, then they swings their blades to decapitate the target.	Force	8	30ft	1d20 + Force Straight *Must move in 1 direction
9	Ninth Fang: Extending Bendy Slash	Inosuke dislocates the joints of his arm to increase the range of his attack.	Force / Finesse	5	15ft	1d12 + Force / Finesse
10	Tenth Fang: Whirling Fangs	The user spins their swords in a circular motion, deflecting enemy attacks.	Force / Finesse	5	30ft	2d8 + Force / Finesse Deflector / Negator *Removes incoming damage

Breathing Techniques (Module)

*These breathing styles appear in the module but are not cannon to the series proper.

Breath of The Ocean

Ocean breathing is a somewhat new form of slaying, invented recently. Users of this form find they are at their best not on land but in fact, in the water. The users practice odd sword movements that seem to swim through the air. Users or... The user... Is odd, carefree and unchained by any responsibility.

Ocean	1	Sea of Swords
Ocean	2	Sorrowful Carp Leap
Ocean	3	Breach
Ocean	4	Windborne Manta, Graceful flock
Ocean	5	Tearful Skerry Blockade
Ocean	6	Surfacing Ama Diver
Ocean	7	Crash of the Umibozu

Special Ability | Sea Legs

While on land, players find their breathing forms deal halved damage. However when engaged in combat while also in water players find their damage dealing 1.5x the normal damage rate.

Style Requirements

Sense | None

Feats | **Flexible Body**

Weapons | Nichirin Katana

Ocean	1	Sea of Swords	The swordsman flies forward, running on the waters surfaces, making contact with every one of their 7 swordswings at their opponent. Each splash sending them flying in a new direction and allowing a new attack.	Finesse	7
Ocean	2	Sorrowful Carp Leap	A rising slash, creating a gigantic vacuum of water underneath as they rise up. With 3 seperate slashes greating a gigantic gate visage, followed by a slash downward.	Force	7
Ocean	3	Breach	A rising slash with fast horizontal movement, the swordsman creates a vortex in the shape of a massive whale, damaging all units within a 15ft radius of their leaping and landing point.	Force	3
Ocean	4	Windborne Manta, Graceful flock	The swordsman glides like a manta ray, delivering sweeping strikes in wide arcs. Each movement flows unpredictably, allowing them to evade attacks while striking with precision.	Finesse	7
Ocean	5	Tearful Skerry Blockade	The swordsman raises a wall of cascading water to block incoming attacks. The barrier deflects damage and sends rippling counterwaves toward the enemy.	Force	6
Ocean	6	Surfacing Ama Diver	The swordsman plunges their blade downward, summoning a protective column of water as they rise.	Force	1
Ocean	7	Crash of the Umibozu	The swordsman delivers a downward slash that creates a shockwave resembling a crashing wave. The force stuns enemies and hurls them back with immense impact.	Force	17

Breath of The West

Western Breathing is still yet unknown, it's master's too unique in their practices to decipher what is perfection of its forms and what is unique to the two slayers. Users of this form carry themselves surely and act only in perfect confidence. The users practice perfect single strike attacks followed by quick gun movement unique to each individual.

West	1	Quick Draw of the Fleet Footed
West	2	Mercurial Dust Devil
West	3	Trailblazer
West	4	Riverside Gold Panning
West	5	Night Flying' Blue Whistler
West	6	Horn Clipper of the Charging Bull
West	7	Greeting the Bone Orchard
West	8	Vermillion Crowbait
West	9	Steel Rot Thunderation
West	10	Lambasting the Faithless
West	11	Choir Call
West	12	Standing Death
West	13	House of the Rising Sun.

Special Ability | Six-Shooter

Everytime players make an attack with a breathing form they may also fire a pistol as a free attack. This attack does not automatically hit.

Style Requirements

Sense | None

Feats | **Strong Body**

Weapons | Nichirin Katana,
Pistol sidearm

West Breathing is too large to fit on this document, please refer to [this document](#) to find it's information

Breath of Snow

Snow breathing is a chillingly graceful style, with movements that are soft and flowing like a flurry. Though it may appear delicate, this is simply a misunderstanding as each swing conceals razor sharp, biting precision. Users of this breathing style are noted for their serene composure and cold attitudes.

Snow	1	Soft Step	The swordsman dashes forward, enshrouding themselves in snow and becoming undetectable until the end of the round. This technique also eases difficult terrain, as well as automatically passes checks made to hide.
Snow	2	Boundless Night Blizzard	The user leaps forward, spinning and slashing midair while advancing. The swordsman unleashes a violent display of slashes a blash before them.
Snow	3	Hail of Silver Ash	The user kicks upward into a rising aerial spin, scattering blade strikes in all directions like a flurry of snowflakes.
Snow	4	Cold Snap, Avalanche	As the sound of frozen cracking trees echo, the user steps forward and swings their blade down with a sudden, crushing weight. The attack mimics a buildup reminiscent of iai strikes.
Snow	5	Woman of the Snow	The swordsman takes an unmoving stance as if possessed. Their next strike is deceptively quick, elegant, and inescapable, like a ghost gliding through frost.
Snow	6	Flake Splitting Slice	A rapid flurry of sword movements that targets weak points, splitting incoming projectiles, weapons, or limbs like snowflakes parting on contact.
Snow	7	Marching Juhyo Forest	The swordsman moves through their enemies, striking in a slow but unstoppable rhythm. Their breath leaves a visible trail, resembling snowy forest of ice-covered trees of the Juhyo forrest.
Snow	8	Silent Burial	The user channels their breath and slides forward in complete silence, blade scraping the earth. A delayed burst of frozen pressure propels the blade in a multi-cutting slash.

Special Ability | Katana Teeth
When any attack made by a snow breather hits a target, the target's body is shredded and temporarily loses 1d4 AC until the end of the round.

Style Requirements

Sense | None

Feats | None

Weapons | Nichirin Katana

Snow	1	Soft Step	The swordsman dashes forward, enshrouding themselves in snow and becoming undetectable until the end of the round. This technique also eases difficult terrain, as well as automatically passes checks made to hide.	Finesse	4	30ft	1d6 + Finesse
							2d8 + Finesse
							Unique*
Snow	2	Boundless Night Blizzard	The user leaps forward, spinning and slashing midair while advancing. The swordsman unleashes a violent display of slashes a blash before them.				Cone
							*The effects of this attack are dealt in a cone, choice of direction by the user.
				Finesse	6	15ft	
Snow	3	Hail of Silver Ash	The user kicks upward into a rising aerial spin, scattering blade strikes in all directions like a flurry of snowflakes.				3d6 + Force/Finesse
				Finesse / Force	8	10ft	Cleave
							*Hits any enemies within range
Snow	4	Cold Snap, Avalanche	As the sound of frozen cracking trees echo, the user steps forward and swings their blade down with a sudden, crushing weight. The attack mimics a buildup reminiscent of iai strikes.				2d20 + Force
				Force	13	30ft	Charge Time
							*Requires 1 round to charge **Being attacked interrupts charge
Snow	5	Woman of the Snow	The swordsman takes an unmoving stance as if possessed. Their next strike is deceptively quick, elegant, and inescapable, like a ghost gliding through frost.				1d10 + Finesse
				Finesse	5	10ft	Chaser
							*Cannot be reacted or dodged away
Snow	6	Flake Splitting Slice	A rapid flurry of sword movements that targets weak points, splitting incoming projectiles, weapons, or limbs like snowflakes parting on contact.				1d8 + Finesse
				Finesse	1	5ft	Deflector / Negator
							*Removes incoming damage

Snow	8	Silent Burial	The user channels their breath and slides forward in complete silence, blade scraping the earth. A delayed burst of frozen pressure propels the blade in a mutli-cutting slash.	Force	15	10ft	4d8 + Force
							Cleave
							*Hits any enemies within range

Building Your Own Breathing Forms

As basic nichirin swords deal a base 1d6 at melee range, breathing forms should go beyond that as a baseline.

Building forms should take into account the damage, the distance and any underlying affects such as if it's unavoidable or if its a straight through attack. Some effects may be changed or reversed in some cases, in which cost varies.

Stamina to Distance Ratio	
5ft / Melee	-3
10ft	1
15ft	2
20ft	3
25ft	4
30ft	5

Slayers with ranged Nichirin weapons that already *have* range such as the Maul, Whip or Chain Blade, do not use stamina up to their weapons base range.

Stamina to Damage Ratio	
1d6	-1
1d8	0
1d10	1
1d12	2
2d8	3
3d6	5
1d20	6
3d8	9
4d8	12
2d20	13
3d20	16
7d10	20

Stamina to Effect Ratio Often Limited to 1 effect per form.	
Straight *Must move in 1 direction	-3
Charge Time *Requires 1 round to charge **Being attacked interrupts charge	-5
Ranged *Can be used from Melee range to allowed distance	3
Regenerator *Regenerates Stamina	3
Deflector / Negator *Removes incoming damage	4
Affliction *Causes Status Affect	3
Chaser *Cannot be reacted or dodged away	3
Cleave *Hits any enemies within range	2
Shield *Creates a 10ft circular shield that negates the next attack.	4

Breathing Form

Combination Attacks

Combination attacks are coordinated strikes performed by two or more swordsmen within a single round. When multiple players target the same enemy and use their breathing techniques in tandem, they may initiate a combination attack. These combined assaults unleash far greater destructive power than a single strike, but doing so requires significant exertion and perfect timing.

To initiate a combination attack, all parties participating must announce their intent at the start of the round. All participating attacks must take place during the same round and all swordsmen must target the same enemy.

When successfully performed, the total damage dealt by all attacks involved is multiplied by 1.5x damage (after totalled).

Drawback Options

A: The stamina cost of each Breathing Technique used in the Combination Attack is increased by 50%, rounded up.

B: Each participant must spend 1 Reaction Point at the start of the round to initiate the Combination Attack.

C: All participants act on the lowest initiative among the swordsmen involved in the Combination Attack for that round. If anyone is knocked out, the combination breaks.

Each player may only execute a combination attack once per encounter.

Slayer Swordsman Sub-Classes

Choosing Sub-Classes

Sub-classes are not new Breathing Techniques but instead unique sword techniques developed outside the traditional Demon Slayer styles. They were not originally designed for fighting demons but were honed for dueling, warfare, or personal combat philosophies.

While they lack the supernatural enhancements of breathing techniques, they grant different attacks and abilities that diversify a swordsman's combat style, making each fighter distinct even within the same Breathing school.

Subclasses level up every three ranks, starting at character creation and improving at Rank Kanoe, Rank Hinoto, and finally at Rank Kinoue.

Nichirin Katana

Nichirin Katana - Standard | **1d6** | The standard Nichirin Blade is a long sword with a sharp, curved blade that can be used to deliver slashes and cuts to demons. The blade is made of a special metal that absorbs heavy amounts of sunlight during its formation, allowing the blade to damage a demon's body and even kill them. The hilt of the blade is wrapped in a comfortable grip, with a circular guard at the base to protect the user's hand. This is the standard weapon used by the demon slayers.

Used in: Sun Breathing, Water Breathing, Flame Breathing, Thunder Breathing, Flower Breathing, Mist Breathing, Ocean breathing

Katana | Way of Crushing Water

A relentless, flowing combat style that overwhelms enemies with sheer force and pressure.

Starting: +2 Raw Power | Crushing Water

Stance: Lose 10 ft of movement speed for +2 to-hit and +4 damage to damage for basic attacks.

Kanoe: +2 Endurance | +2 Agility

Hinoto: [**Reaction**] River Splitter: With a finesse check equal to or higher than the attack roll, slice and destroy any projectile and avoid damage.

Kinoe: +2 Force | [**Attack**] Tsunami: (1/day)
If you succeed a basic attack, make another basic attack, this repeats until you fail to land another attack.

Katana | Way of Carving Stone

A powerful, heavy-hitting technique that prioritizes armor penetration and breaking defenses.

Starting: +2 Dexterity | Carving Stone

Stance: Enemies hit by basic attacks lose -2 AC. (stacks)

Kanoe: +2 Tolerance | +2 Perception

Hinoto: | [Reaction] Removal: Make an attack roll against an enemy limb, if it succeeds the user cuts off that limb/

Kinoe: +2 Raw Power [Attack] Boulder Cutter: (1/Encounter) The player may automatically succeed a basic attack if the enemy has a lower AC than them.

Katana | Way of Piercing Wind

A fast, agile fighting style that emphasizes precision, mobility, and rapid strikes.

Starting: +2 Swiftess | Piercing Wind

Stance: Gain a free attack with your basic attack if an enemy misses their attack against you.

Kanoe: +2 Agility | +2 Intuition

Hinoto: | [Reaction] Frigid Winds: Move up to half your movement speed, hitting any enemies passed with damage equal to your SPEED.

Kinoe: +2 Finesse [Attack] Winds of War: (3/day) When hitting an enemy lower in the initiative order than you, add your SPEED level in damage die to your basic attack.

Katana | Way of Warding Fire

A defensive and disciplined swordsmanship style that excels in defensive positions.

Starting: +2 Endurance | Warding Fire

Stance: Gain +4 AC after using a basic attack.

Kanoe: +2 Reaction Time | +2 Survival

Hinoto: | [Reaction] Backdraft: Deal back half of any damage you just received to any target within range of you.

Kinoe: +2 Force [Attack] Stunning Flames: (1/Encounter) When hitting an enemy, contest a check with them with FINESSE, if you succeed they are stunned until the end of the round, on a failure they do not.

Nichirin Serrated Blades

Restricted to: Users of Beast Breathing

Nichirin Blade - Serrated | **2d6** | The Serrated Nichirin Blades are a formidable pair of weapons, each consisting of a standard-sized Nichirin katanas with a unique twist. The blades are chipped with numerous gashes along the edge, giving them a serrated appearance.

The indigo-gray color of the blades lets others know this slayer isn't to be trifled with. Notably, these blades lack a handguard, allowing for quick and agile movements in combat, but also requiring exceptional skill and precision to wield effectively.

Serrated | Fang of the Boar

A reckless, aggressive fighting style that thrives on relentless offense.

Starting: +2 Raw Power | Suidae Stance: You may attack twice on your turn, but all attacks against you gain +3 to-hit until your next turn.

Kanoe: +2 Athletics | +2 Mithridatism

Hinoto: [**Reaction**] Wild Rush: When an enemy attacks you, you may immediately move 20 ft and make an attack against any enemy passed.

Kinoe: +2 Force | [**Attack**] Frenzied Charge: (1/day) Move up to 20 ft in a straight line. If you hit, deal an extra 1d8 damage and knock the target prone.

Serrated | Fang of the Bear

A brutal, crushing combat style that focuses on overwhelming strength and endurance.

Starting: +2 Fortitude | Ursine Stance: If you successfully land a basic attack, gain temporary HP equal to half the damage dealt until the end of the round.

(rounded down).

Kanoe: +2 Raw Power | +2 Endurance

Hinoto: [**Reaction**] Mauling Counter:

When an enemy within 5 ft attacks you, immediately make a counterattack.

Kinoe: +2 Force | [**Attack**] Bone Breaker: (1/day) Make a powerful downward strike. If the attack hits, the target must make a Fortitude save or have their movement speed reduced to 0 for one round.

Nichirin Twisted Blade

Restricted to: Users of Serpent Breathing

Twisted | Orochi Blade

A sword style emphasizing fluid, unpredictable strikes that coil and lash out from multiple angles, overwhelming foes.

Starting: +2 Raw Power | Eight Head

Stance: After missing a basic attack, gain advantage on the next one.

Kanoe: +2 Agility | +2 Deception

Hinoto: [**Reaction**]

Kinoe: +2 Finesse | [Attack] Eight Fang

Strike: (1/day) Make four attacks at once.

If all hit, the target must make a Fortitude save or be stunned for one turn.

Nichirin Blade - Twisted Blade

| **1d8** | The Twisted Blade is a mesmerizing katana with a distinctive curvy, winding Nichirin sword, bathed in a captivating lavender hue. Its blade swerves and strikes with a snake-like vigor, reflecting the courage and determination of its wielder.

The sheath, equally unconventional, mimics the fluidity of the blade, creating a harmonious and eye-catching set. With this remarkable blade in hand, serpent breathers find slaying far easier.

Twisted | Tsuchinoko Blade

An opportunistic style that takes advantage of enemy overextensions & openings.

Starting: +2 Cunning | Cryptid Stance:

The first basic attack in combat from deals double damage.

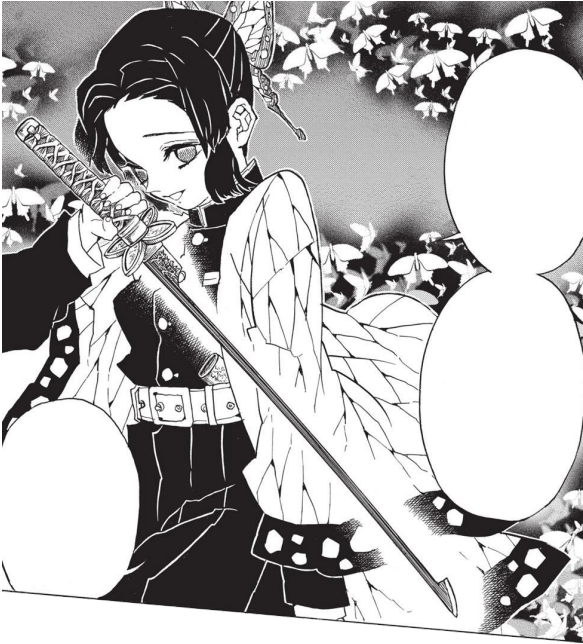

Kanoe: +Athletics | +2 Intuition

Hinoto: [**Reaction**] False Opening: When targeted, roll Deception against the attacker's Perception. On success, impose disadvantage on the attack.

Kinoe: +2 Force | [**Attack**] Vanishing Fang: (1/day) Strike and immediately disengage to the nearest cover becoming hidden.

Nichirin Needlepoint

Restricted to: Users of Insect Breathing

Nichirin Blade - Needlepoint | **1d4** | The Needlepoint Nichirin Blade is a weapon of deadly precision. Its thin blade, lavender-blue in color, features a needle-like tip that can deliver a lethal strike. The scabbard of the blade is specially designed to store poison, which can be administered through the needlepoint to deliver a potent venom to demons during combat.

Needlepoint scabbards also contain a large amount of the slayers chosen poison, automatically coating the blade everytime it is sheathed.

Needlepoint | School of the Beetle

A stubborn, ironclad defensive style that turns endurance into offense.

Starting: +2 Endurance | Stalwart Atlas:

If you do not move on your turn, gain +4 AC until the end of your turn.

Kanoe: +2 Mithridatism | +2 Raw Power

Hinoto: [**Reaction**] If hit by an attack, roll Endurance and reduce the damage by your roll.

Kinoe: +2 Force | [**Attack**] Burrowing Charge: (1/day) Move up to 20 ft in a straight line. The first enemy in your path is knocked prone until next round.

Needlepoint | School of the Wasp

A nimble, evasive technique that strikes at weak points with rapid precision.

Starting: +2 Cunning | Swarming Wasp:

After landing a basic attack, retrigger any poison effects.

Kanoe: +2 Agility | +2 Perception

Hinoto: [**Reaction**] Needle Reflex: If attacked, roll Acrobatics against the attack. On success, retaliate with an action.

Kinoe: +2 Speed | [**Attack**] Piercing Dance: (1/day) Attack three different targets in one turn.

Nichirin Maul

Nichirin Blade - Maul | **1d12** | The Maul Nichirin Blade is a fearsome weapon, consisting of a spiked flail and a battle axe connected by a long chain. Its dull gray color belies the immense power that it holds.

The maul and axe are incredibly heavy, requiring a great deal of strength to wield effectively. With its devastating impact and crushing power, the Maul Nichirin Blade is capable of dealing devastating blows to demons in battle.

Restricted to: Users of Stone Breathing

Maul subclasses do not have “Stances” but instead passives their maul ends grant that are consistently active.

Maul and Chain | Morning Star

A brutal, high-impact fighting style that thrives on unrelenting offense.

Starting: +2 Raw Power | Morning Star: Basic attacks deal +4 extra damage but impose -2 to your AC.

Kanoe: +2 Endurance | +2 Strength

Hinoto: **[Reaction]** Meteor Swing: Swing in a full circle, all targets within range make a finesse check of 16, taking 12 damage on a fail, 0 on a save.

Kinoe: +2 Force | **[Attack]** Starfall Crush: (1/day) Leap up to 15 ft and slam your weapon down, anyone within 20 ft must make a Force saving throw or be stunned until the end of the round.

Maul and Chain | Greatsword

A balanced, devastating combat form that controls the battlefield through force.

Starting: +2 Balance | Greatsword: Gain +2 to-hit and +4 damage against enemies with lower Strength than you.

Kanoe: +2 Athletics | +2 Reaction

Hinoto: **[Reaction]** Iron Curtain: As a reaction add +10 AC to an ally within sight until the end of the round or until they are attacked.

Kinoe: +2 Finesse | **[Attack]** Crescent Cleave: (1/day) Make a basic sweeping attack that hits up to three enemies in front of you for maximum basic damage.

Nichirin Whip Blade

Restricted to: Users of Love Breathing

Nichirin Blade - Whip | **1d10** | The Nichirin Whip Blade is a unique and versatile weapon in the game, resembling a long, flexible whip-like sword. Its distinctive pink color is eye-catching and adds a touch of elegance to its deadly form.

However, unlike traditional swords, the Nichirin Whip Blade must be wrapped in its sheath rather than sheathed normally, due to its flexible nature. This allows for swift and fluid movements, making it a formidable weapon in the hands of a skilled demon slayer.

Whip Sword | *Gift Giving*

A tricky, opportunistic style that disrupts enemies with unexpected angles.

Starting: +2 Intuition | **Heartstopper:** If an enemy misses you, gain advantage on your next attack against them.

Kanoe: +2 Swiftiness | +2 Accuracy

Hinoto: [**Reaction**] Ribbon Wrap: Lash out and impose disadvantage on any attack being made within 30 ft.

Kinoe: +2 Force | [**Attack**] Dancing

Laceration: (1/day) Attack twice, and if both hit, remove a chosen appendage from the target.

Whip Sword | *Acts of Service*

A protective, defensive combat style that focuses on battlefield control.

Starting: +2 Tolerance | **Pleasure to Serve:**

If an enemy within 5 ft targets an ally, you may swap places with them and take the attack.

Kanoe: +2 Endurance | +2 Intuition

Hinoto: [**Reaction**] Heart Grip: If a target reacts or dodges away from an attack by an ally, negate it by holding them in place with a Raw Power check (DC 15).

Kinoe: +2 Force | [**Attack**] Coordinated

Execution: (1/day) After an ally lands an attack, immediately follow up with your own strike. If it hits, deal double damage.

Nichirin Dual Chainswords

Nichirin Blade - Dual Chainsword | **2d10** | The Nichirin Dual Chainswords are a unique pair of hulking metal. These amber colored blades of nichirin are both several feet in length and require immense strength not only to swing but to spin and throw. Unlike traditional swords, the Nichirin Dual Blades must be wrapped in cloth rather than sheathed normally, due to its massive stature. This allows for swift drawing of them. These blades have extended range up to a full 5ft from their base swings.

Dual Chainsword| Kabuki Style

A bold, theatrical combat style that overwhelms enemies with exaggerated movements and strikingly aggressive attacks.

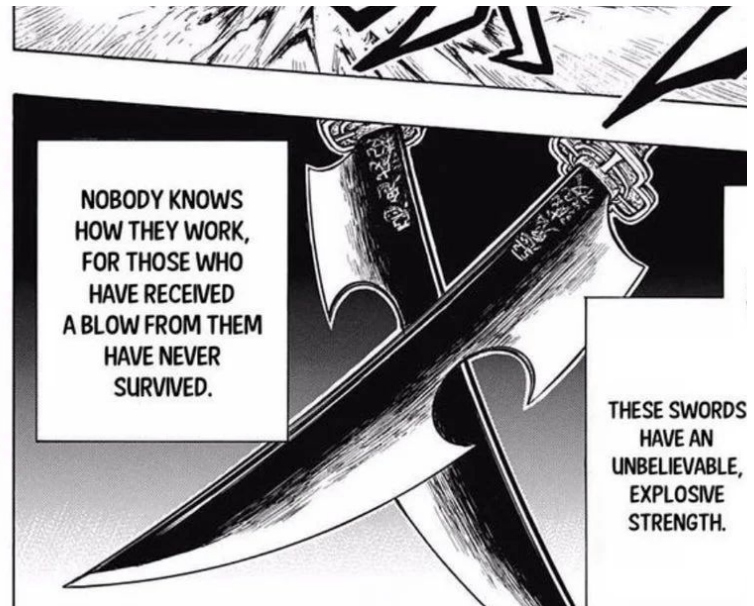

Starting: +2 Raw Power | **Powerful:** When attacking multiple enemies in a round, gain +2 to hit and +2 damage for each enemy struck (max +6).

Kanoe: +2 Balance | +2 Agility

Hinoto: **[Reaction]** Flourish: Instantly swap places with an ally within 15 feet. This movement does not provoke opportunity attacks and allows you to use your chainswords for a bonus attack against an enemy that is now within range.

Kinoe: +2 Force | **[Attack]** Rising Typhoon: (1/day) Perform a dramatic spinning strike against all enemies within 10 feet. Each target must make a Fortitude saving throw or take 2d8 damage and be knocked prone.

Restricted to: Users of Sound Breathing

Dual Chainsword| Nihon Buyō Style

A refined combat style combining the fluid, rhythmic movements of traditional Japanese dance with precise, deadly strikes.

Starting: +2 Performance | **Graceful:** During combat gain +2 to your AC and deal 1d6 extra damage to enemies who miss their attacks against you.

Kanoe: +2 Reaction Time | +2 Accuracy

Hinoto: **[Reaction]** Rhythmic Evasion: Move 30 feet instantly in a fluid, dance-like motion, allies passed gain a +2 to their next attack while enemies gain -2

Kinoe: +2 Force | **[Attack]** Moonlit Elegance: (1/day) Strike an enemy twice. Each hit deals +3 damage, and if both hits land, the target must make a Fortitude saving throw or lose an appendage.

Demonification

Class Information

Demonification Class Abilities

Blood Points are a new pool of points slayers draw from, gaining them only when demon flesh is consumed. Consuming demon flesh of strong demons yields larger amounts, all points being used to replicate demonic abilities. Blood points can be accrued and stored to a maximum of $10 + \text{Fortitude}$ at start.

Repeated Action is an attack roll that is used over and over that increases with sequential attacks. Every round Repeated Action is used increases the base damage by +1, this bonus also stacks with the user's Force.

Replacing Stamina increases is natural for demonification users when they rank up, rather than receiving more stamina every rank demonification users alter between gaining another bonus +1 to repeated action and gaining +2 to every piece of demon flesh consumed.

Demon Healing is an ability thought only to be used by demons, but, using blood points players can recover injuries like internal bleeding, missing limbs and even destroyed organs.

Blood Points from flesh per rank

Starting items

Trench Gun

Wakizashi

Low Rank - $1d4 + 1$ BP

High Ranking - $2d4 + 2$ BP

Lower Moon Disciple - $1d10 + 3$ BP

Lower Moon - $2d6 + 4$ BP

Upper Moon Disciple - $3d6 + 5$ BP

Upper Moon - $1d20 + 8$ BP

Demonification

Healing

After a demon's flesh is parted from its body the user may eat a piece of flesh and gain Demon Points that depend on the demon's ranking. To roll healing with Demon Healing the user uses the relevant rank of the highest demon last consumed.

Demon Healing by Ranks

Low Rank - 1d10 Health

High Ranking - 2d10 Health

Lower Moon Disciple - 1d20 Health

Lower Moon - 1d20 Health

Upper Moon Disciple - 1d100 Health

Upper Moon - 1d100 Health

Unique Demonification Class Reactions

	Heal React
1	Using 1 Point(s) automatically roll to heal equal to the highest rank of demon blood recently consumed
2	Using 2 Point(s) will heal similarly to one point usage, though it won't be rolled as the healing will be the maximum amount allowed by the die.

	Enhance React
1	Using 1 Point(s) automatically allows the user to enhance their strength or speed to the level of the demon most recently eaten.
2	Using 2 Point(s) automatically allows the player to enhance their speed and their strength to the same level of the demon most recently consumed.

Demonification

Medicine

Demonification comes with a bit of a bane, using blood points slowly turns the user into a full on demon with *demonization*. Demonization and the points that quantify it accrue for every blood point you use.

The Demonization limit for any swordsman can be calculated by:

$$10+(\text{BASE FORTITUDE})$$

Demonization points are reset after a long rest, you may also -2 to your current amount every hour.

There is Medicine available only at demon slayer corp estates. You can even take them into your bag prior to a mission or request them during supply drops. Demonization Medicine works in two specific ways

Active Medicine

Actively reduces demonization during battle, halving all incoming demonization points, this effect ends after combat ends.

Repair Medicine

Reduces current demonization by half.

Other methods of demonization cleansing involve learning the “Expel” ability through study skills. This ability allows users to remove their demonization points at the cost of their own health.

Demonification Points

Using Demonification Points in Combat

MOVE NAME	MOVE DESCRIPTION	Cost	Demonization
Demon Strength	Gain Force equal to the demon being fought.	3	1
Demon Speed	Gain Speed equal to the demon being fought.	3	1
Demon Healing	Heal equal to the rank of the demon.	4	2
Limb Regeneration	Recover one limb lost during battle.	6	2
Blood Demon Art -Small	Use a small scale version of the Demons BDA.	6	3
Blood Demon Art -Large	Use target demons full scale BDA.	10	4
Moves learned from Special Slayer Corp Training.			
Constant Limb Reg.	A slow constant regeneration of lost limbs.	0	1 per round
Store Demon Art	Stores a demon art previously used for another use in a different battle.	10	5
Expel	Remove all demonization points, costing half of the players base health.	0	Removes ½ of total Demonization

Demonification Sub-Classes

Nichirin Wakizashi

Sword | Flesh Carver

A brutal, sadistic combat style that revels in carving into opponents, drawing power from pain.

Starting: +2 Tolerance | Ravenous Hunter: When you take damage from an enemy within melee range, immediately make an attack against them.

Kanoe: +2 Raw Power | +2 Mithridatism

Hinoto: [**Reaction**] Demon Focus: Gain another action at the cost of half your current BDP.

Kinoe: +2 Fortitude | [**Attack**] Bloodletting Frenzy: (1/day) For the next 3 attacks, if your target is bleeding or below half HP, deal an additional 1d6 damage per attack.

Nichirin Blade - Wakizashi | **1d4** | The wakizashi is a shorter version of the standard Nichirin Blade, with a blade length of about half that of the standard blade. It is designed for use in close quarters combat or as a secondary weapon. The blade is still made of the same special metal that reacts to demon blood, and is sharp enough to deliver lethal cuts to demons. The hilt of the wakizashi is also wrapped in a comfortable grip, and it comes with a circular guard at the base to protect the user's hand.

Wakizashi | Crackshot

A precise and calculated combat style that blends blade and firearm mastery, ensuring every shot counts.

Starting: +2 Accuracy | Propped Shot: User takes steady aim which reduces their movement to zero but adds +8 to hit.

Kanoe: +2 Perception | +2 Survival

Hinoto: [**Reaction**] Correction: As a reaction, reroll a failed check to hit a target with your gun.

Kinoe: +2 Finesse | [**Attack**] Double Tap: (1/Encounter) Recreate previously made attack perfectly.

Level 9 Magistrate	Major Title Change			
Level 10 Castellan				96

Kakushi

Class Information

Kakushi are particularly odd in their nature as a class. Players who select kakushi will not do much in the way of fighting. Their role in the destruction of demons is, however, anything but useless. Kakushi play a key role in supporting slayers, on and off their dangerous missions.

Kakushi Abilities

Large Pack, otherwise known as a *backpack*, kakushi carry a larger stash of items on hand. As opposed to the normal 4 slots a swordsman can carry, kakushi are able to carry around 8 items.

Major is what is considered kakushi's "class", granting them abilities and features that allow them to support their slayer swordsman companions and friends.

Secondary Study allows kakushi who majoring in a specific skill set to dual-major. At 5th level, players will be allowed to choose a second class they'd like to take skills from and add them to their roster.

The fatal flaw of all kakushi is a simple, unchangeable fact. Kakushi are not slayer swordsman, due to something, sometimes *things*, they are incapable of doing. Any players playing a kakushi may select one base stat they may then choose to keep at 1 for their entire playthrough.

Kakushi

Majors List

Kakushi Majors

Swordsmith: A kakushi trained in the ways of metalworking and craft with the forge.

Stat Focus | *Force*

Marksman: A kakushi who has honed their skills with firearms as lethal support for swordsman in the field.

Stat Focus | *Finesse*

Chef: A kakushi well versed in the culinary arts, creating healthy, revitalizing food for all those who hunger.

Stat Focus | *Fortitude*

Driver: A kakushi who uses vehicles as an extension of their body. These kakushi can drive, fly and sail anywhere swordsman are needed.

Stat Focus | *Speed*

Doctor: A kakushi trained to heal injuries and stitch wounds with intense medical knowledge

Stat Focus | *Smarts*

Tailor: A kakushi well practiced with a needle a thread. They produce all the uniforms and clothes worn by the corps.

Stat Focus | *Finesse*

Demon

Class Information

Demon Abilities

Blood Demon Art is a unique ability derived from your demonic power, inspired by the techniques of the Twelve Moons. Each Art reflects your nature and fighting style, allowing for attacks that combine or utilize various effects. Players may use premade examples from the module or design their own, crafting a signature ability. These attacks increase in power the longer you play, but cost blood points gained from either resting or eating human flesh.

Extraordinary Anatomy represents the unnatural traits that shape your demonic form. The features such as wings, gills, tentacles, or weapons grown from your own flesh are how your body functions and fights. Once chosen, they remain with you throughout the campaign, though you may evolve them one more time before reaching the last level. They are additional tools to use outside of blood demon arts, though they can be used in tandem.

Demon Healing by Ranks

Starting items:

Low Rank - 1d10 Health

High Ranking - 2d10 Health

Lower Moon Disciple - 1d20 Health

Lower Moon - 1d20 Health

Upper Moon Disciple - 1d100 Health

Upper Moon - 1d100 Health

Extraordinary Anatomy

Starting Points: 15

Name: Description

Point Cost:

Wings: A pair of wings sprout out of your back/body granting you flight for 30ft per round.

Point Cost: 3

Extra Arms: Additional limbs grow out from your body allowing you to wield more weapons at once. Users can make an additional attack per set of arms gained.

Point Cost: 2 (per arm) Max: 4

Multiple Eyes: Gain a bonus +5 to perception checks.

Point Cost: 1 (per eye)

Malleable Form: Gain the ability to transfigure your body into any form you so desire relative to your size. Taking damage reverts this form. Outside of various super senses, this form is indistinguishable to the human eye.

Point Cost: 5

Name: Description

Point Cost:

Blood Demon Arts

Building blood demon arts in this system is quite simple. Since blood demon arts are so varied in damage, range and many other scopes.

Creating attacks for your blood demon art is far easier than most other sections of the system. Each attack will have preset damage, range, effects and more.

At the start of character creation demons will receive X starting points and will use those to design their first attacks. As they continue on, they will be able to unlock more types of attacks to choose from and even better customizations for each of their existing attacks.

Damage being arguably the most important part of a blood demon art, increases in scope the higher the level of the demon. Damage can also be affected by certain effects to players should keep an eye on each effects boons and banes.

Range is one of the only parts of blood demon arts that range wildly from level to level, there is no steady increase in distance.

Effect Slots are the amount of effects that a blood demon art attack is able to utilize without coming undone. The stronger attacks get the less effects it's able to use, making the weaker attacks better for afflicting.

Demon Ranks

Demon ranks follow an odd power structure in this era as moons themselves exist, though on a different scale than during the reign of Muzan Kibutsuji. “Upper” or “Lower” moons as a rank no longer exist in name the 12 strongest demons in existence all carry the moniker of “Moon” along with their very own given title beside it, this is due to the tight gap in power they all share. Instead the rankings below are merely areas to scale their power in reference to an older model of ranking.

Level	Name
1	Low Ranking
2	High Ranking
3	Lower Moon Disciple
4	Lower Moon
5	Upper Moon Disciple
6	Upper Moon

Demon Stats

Creating a demons base stats, players must start with the basic setup of regular character creation with the layout of numbers

(0,1,2,3,3,5)

After creating your basic lay out, players take choose another set of numbers to add onto their previous based on the rank they intend to create.

Lower Rank	(4,3,2,1,1,1)
Higher Rank	(4,4,3,3,2,1)
Lower Moon Disciple	(5,5,4,3,3,2)
Lower Moon	(6,6,5,5,4,4)
Upper Moon Disciple	(9,7,6,6,6,5)
Upper Moon	(10,10,10,9,9,8)

Health is calculated by:

(Starting HP) + (5 x **Force**)

Demon have no need for stamina, their demonic bodies do not feel tired. A demons total for their blood demon points however can be calculated by:

10 x **Fortitude**

Demon Actions

Demons have, depending on their level, the ability to perform more than one action per turn. Identifying how to use those actions in integral for their survival, whether to prioritize healing, attacking or even activating their demon blood art. Just like humans, they may move every round as well, though depending on the demons abilities and body shape, the movement may heavily differ.

Demons have actions equal to

$$1 + (\text{Speed} \div 5)$$

Blood Art	Depending on the demon's bloodline, demons have access to a few commonly shared blood demon arts, as well as their own.
Heal 2 BDP	Demons, depending on their rank, can heal a significant amount of health using one of their actions to do so during their turn.
Regrow 4 BDP	Using an action demons can elect to, depending on the strength of their rank, regrow body parts that have been removed from them with varying speeds.
Cleanse	Using an action demons can cleanse 1 stack of poison per their rank.
Infect	Demons of Lower Moon status or higher are able to infect human beings, granting them the ability to turn into demons 4 ranks lower than their gifter.
S.O.S	Demons of a certain branch may call out to nearby demons of the same bloodline. Demons of different bloodlines have no connection to each other and cannot call out for help to each other.
Execute	If a Demon is of the rank Upper Moon Disciple or Upper Moon, the demon gains the ability to execute a human being with 5hp or less. Executions cannot be dodged, but can be reacted to.
Attack	Using an action or reaction point, demons can attack using previously laid out attacks common to all demons.
Block	As a reaction to an attack or as an action preemptively, demons can prepare for an attack and attempt to block it.
Dodge	Using a common reaction or reaction point, demons can avoid any attacks coming at them.

Demon Sub-Classes

Demon Variants

The 12 Beautiful Moons

The Moons Prefix	Identifying Features
Golden Moon	Disciples of the golden moon are only signified by gold attire.
Burning Moon	Flames, scorch marks, burn scars, ashes.
Rabid Moon	Fur, sharp fangs, animal eyes.
Clockwork Moon	Gears, clocks, cogs, mechanical pieces or metal armoring.
Ancient Moon	Bones. Just... Bones.
Mirror Moon	Mirrors or reflective surfaces
Shadowed Moon	No known identifiable features.
Grieving Moon	Formalwear, partial gore, tear streaks.
Garden Moon	Flowers, plants, flora, fruits or Vegetables.
Artisan Moon	Artisan moon disciples are identified by artistry tools carried.
Diving Moon	Marine life, crustaceans, sea life and fishing tools.
Patchwork Moon	Cloth, specifically canvas or other patches of nondescript fabric

Demons of the new era have learned a new terrifying trick that could possibly spell out the end of humanity. Demons of the modern age can now *replicate on their own*. The issue being, if they are too weak, once they die so will their replications. To ensure the safety of her throne the demon queen has created a squad of 12, upper moon level demons. These 12 rarely show themselves and act as leaders for smaller armies. Though due to their sheer power, all of the subordinates now take on attributes of their leader. Finding these lackies may lead players back to their leaders, taking them out would reduce the entire population by a solid 1/12th, which would in turn be a massive win for humanity.

Variants | Blood Demon Arts

Of the 12 variant demons, 12 different classes of demon are available for those who... want to be demons? Who would *want* to be a demon!?

These variants are as follows.

- Golden
- Burning
- Rabid
- Clockwork
- Ancient
- Mirrored
- Shadowed
- Grieving
- Garden
- Artisan
- Diving
- Patchwork

Each of these variants has a separate possible selection of abilities, passed on by their predecessor.

Level 1 Low Ranking Attack Ability	Level 4 Lower Moon Attack Ability
Level 2 High Ranking Attack Ability	Level 5 UM Disciple Attack Ability
Level 3 LM Disciple Attack Ability	Level 6 Upper Moon Attack Ability

You can read the list of abilities for character creation as follows, starting on the left column the first three levels, then to the bottom and then the top of the right column down.

Demon Blood Art | *Golden Moon*

Level 1 Low Ranking Attack: Ability	Level 4 Lower Moon Attack Ability
Level 2 High Ranking Attack Ability	Level 5 UM Disciple Attack Ability
Level 3 LM Disciple Attack Ability	Level 6 Upper Moon Attack Ability

Demon Blood Art | *Burning Moon*

Level 1 | Low Ranking

Attack: Burn

Burning moon disciples are always able to cast out fire dealing a minimum of 1d4+Fortitude. Upon hitting this also inflicts a stack of Burn. Rolls finesse to hit their AC.
BDP Cost: 4 Points

Ability: Burning Skin

A burning moon disciple's body always remains on fire in some regard, being hit by physical attacks (unarmed) always inflict a stack of burn.

Level 4 | Lower Moon

Attack: Ignite

Ignite allows the demon to create an eruption marker on a target, be it a person or a place. This marker is undodgeable, but can be removed by using methods to clear it off, like water. After a round this target erupts for 1d10+Fortitude.
BDP Cost: 15 Points

Ability: Kindlings

Summon 1d6 burning demon minions that use the following stats. (6,6,6,7,7,8)

Level 2 | High Ranking

Attack: Flare

Flare allows the user to cast Burn on *multiple targets* at once or at one target multiple times (3 targets + 1 per level past level 2)
BDP Cost: 4 Points per target

Ability:

Level 5 | UM Disciple

Attack: Incinerate

Ability

Level 3 | LM Disciple

Attack: Blaze

Blaze allows the demon to target areas with an erupting blaze, 15 feet within a square or circle of selected area that erupts the following turn for 1d8+Fortitude damage to all inside. Rolls finesse to hit their AC.
BDP Cost: 10 Points

Ability: Ash Gate

Demons of the burning moon can transport themselves to ash piles of targets they're either currently burning or have previously burned.

Level 6 | Upper Moon

Attack: Cremate

Any target with less than 10 HP can be targeted by this attack, rolling finesse to hit. If the target is hit and cannot dodge, they are instantly burned black and die, having their insides burned beyond saving. Those hit by this ability cannot be revived.
BDP Cost: 45 Points

Leveling Up

Level Up

Rank Up Skills & Skill Slots

Rank Up Skills

When a player ranks up, you may notice they gain a +1 to their “study slots” a noticeable part of the second page of the character sheet. These study slots are actually abilities or actions players can choose to study and add to their arsenal.

When a player gains a study slot they may choose from the list of available skills in the rank up skill section of the guide. These skills are separated into several sections for each tier. These tiers are for levels two, four, six, eight and ten, otherwise known as Mizunoe, Kanoë, Tsuchinoë, Hinoë and Kinoë. Players are free to choose from any level they match in rank, as well as any below. Each skill can only be taken one time.

Superior Skills

Superior skills, as they are called by the corps training logs and diaries, are considered the major stepping stones of becoming a great demon slayer and even a hashira. These skills act more as a milestone for the players masteries of breathing techniques and total concentration breathing.

These abilities appear on a players sheet after meeting the prerequisite requirements, essentially acting as free abilities. Players are encouraged to explain or roleplay their training sessions for these skills and elaborate on the struggles and trials faced during training. These also allow players to add new features to their character to show growth.

Level Up

Auxiliary Study Slot Methods

Players gain rank up skills upon leveling up, though it isn't the *only* method to gaining rank up skills or learning new abilities.

Hashira Training

There will, on occasion during sessions and missions, situations where players not only meet but interact with *Hashira / Pillars* depending on which term you prefer. Hashira have the ability to impart knowledge onto the younger slayers and even help train them. When a Hashira offers a slayer training, it is essentially a free ability to learn and add your arsenal, though you do not get to pick the skill itself.

Moon Slaying

Another great method to gain free study slots is challenging and defeating demons of incredible power. If players are able to slay moon level demons without the help of others, the player then gains a free undetermined study slot. This is true for Lower Moon Disciple, Lower Moon, Upper Moon Disciple and Upper Moon ranked demons. This study slot can freely be chosen afterward.

Rank Up Skills List

Slayer Swordsman Skills (Any Rank)

Form Damage Increase:

Effect: All breathing style forms known gain a damage die.

Start a Secondary Breathing Style:

Effect: Begin training a new style of demon slaying. Add 1 new form after every completed mission until the style is fully mastered.

Perfect Sync:

Effect: When swordsmen perform combination attack, the total damage dealt by all participating Breathing Techniques is doubled (2×) rather than multiplied by 1.5×.

Rank Up Skills List

Demonification Skills (Any Rank)

Healing Training:

Effect: Demonification users learn to use their healing skill using reaction points.

Demon Cultured Palate:

Effect: Demonification users gain a die more of Blood Demon Points per piece of demon flesh eaten.

Rank Up Skills List

Effect: Gain the ability to Attack with reaction points.

Cardio Training:

Effects: Gain an extra 15 ft of movement speed during rounds in combat.

Drivers License:

Effect: When driving, players no longer require checks while driving, unless facing hazards.

Poison Practitioner:

Effect: Players can create basic poison and poison cures without needing a check. Both Poison Cultivation Kit and Demon Poison Remedy Kit still required.

Sniper Training:

Effect: Rifles with scopes gain advantage to to-hit and damage rolls.

Social Prowess:

Effect: Gain a +5 bonus to social checks made against non-corps members such as shop owners, civilians and police.

Form Damage Surge:

Effect: All breathing style forms known gain 2 damage die.

Rank Up Skills List

Tsuchinoe Rank

Quick Draw Training:

Effect: Gain the ability to switch weapons with reaction points.

Medical Training:

Effect: Gain the ability to apply medical equipment with reaction points.

Executioner:

Effect: Instantly kill any demon with a base health of 25 or under with a basic attack..

Base Stat Increase:

Effect: Increase base stats with a pool of 5 new points

Flexibility Training:

Effect: Refer to Superhuman Feats

Guillotine:

Effect: Instantly kill any demon with a base health of 75 or under with a basic attack.

Death's Shadow:

Effect: Attacks made from stealth deal an additional 3d10 damage.

Form Damage Escalation:

Effect: All breathing style forms known gain a 3 damage die.

*Superior Skill

Total Concentration Breathing: Constant

Total Concentration Breathing: Constant (TCB:C) is a breathing technique which involves expanding one's lungs to intake as much air as possible, accelerating one's blood flow and heartbeat while increasing their inner body temperature. The training of which for this is rigorous, painful and requires incredible diligence.

Effects of Mastering Total Concentration Breathing: Constant
Concentration Breathing no longer cost stamina to maintain.
Players regain **1 stamina per round** while TCB:C is *active*.
Players *automatically* stop bleeding when they use *Recovery Breathing*.

This skill is automatically added to your skill list at Rank: Kanoto.

Marked Form

The “mark” in “marked form” refers commonly to the marking that appears on the face or another visible location of the body of Demon Slayers. Each Demon Slayer possesses a unique pattern to their Mark which appear to be based on the Breathing Style they utilize, usually signaling a great shift in power for all to see. Entering this state of being is akin to entering an adrenaline spike state.

Positive Effects of entering Marked Form

All damage dealt to targets using breathing styles is rolled with advantage, meaning players will roll their damage twice and take the highest number. Along with this, recovery breathing recovers double the normal amount of stamina.

Negative Effects of entering Marked Form

Stamina costs increase by 50% of their base cost. If you reach zero stamina, you will take 1d12 damage before losing consciousness. Your character is now set to die by your mid 20’s, unless you receive a antibiotic shot from a corp doctor. Players above this age must receive this shot within 24hrs of activating their marked form or they die.

This skill is automatically added to your skill list at Rank: Tsuchinoe

See-Through World

Entering the see-through world state allows players to retroactively analyze any targets body, perfectly visualizing their organs, bones and muscles. This enhanced sight allows users to target key weak points in their targets body or form.

Positive Effects of seeing the See-Through World

All non-breathing techniques are instant criticals if they succeed, meaning they deal double damage. Attacks made against you have disadvantage as well, unless they are area of effect attacks.

Negative Effects of seeing the See-Through World

It is not possible to use recovery breathing whilst See-Through World is active.

This skill is automatically added to your skill list at Rank: Hinoe

Red Blade

The Red Blade Technique, once thought to be lost to the passage of time, is one of the pinnacles of demon slaying. By attaining a level of skill nearly none do, slayers gain the ability to heat and wield their blade at an extreme temperature, causing far more damage to demons than ever before. These blades are incredibly dangerous and the reason it requires such mastery is because with improper form or care the blade can burn or damage the user or even break if misused.

Positive Effects of gaining a Red Blade

Demons struck by a weapon with the red blade effect are no longer able to heal for the current round. Red Blade attacks deal double damage to all demons and demonic entities.

Negative Effects of gaining a Red Blade

This effect lasts 3 rounds, reactivating your red blade before 10 rounds have passed will require a d100 roll in which anything below a 50 causes your blade to melt and break.

This skill is automatically added to your skill list at Rank: Kinoe

Tools and Items

Alternate Main-Weapons

Due to an influx of nichirin ore, the Demon Slayer Corps, in an attempt to increase success rates, are attempting to craft new weapons that may better harmonize with certain slayers. These weapons are called “alternate weapons” and while yes, they can be used for breathing techniques, they take some getting used to.

Alternate weapons, while dealing varying damage, also require that breathing techniques be rolled for now. Included in this, these also carry with them a bonus and a negative effect! Some may increase damage, range, etc, though each does also come with a downside.

How to read:

Weapon Name | Description

Boon: (Positive) Bane: (Negative)

Odachi | 1d12 | A massive, curved greatsword, able to cleave through armor, flesh and bone. *Boon:* Add +1 damage die to damage dealt and +5ft reach with an Odachi. *Bane:* All attacks have -5 to hit with basic attacks.

Naginata | 1d10 | A pole weapon with a long shaft and a curved, single-edged blade at the end. *Boon:* +10 ft of range to all types of attack with this weapon. *Bane:* Melee range for Naginata starts at +5ft away, anything closer cannot be hit.

Cutlass | Desc

Patta |

Hook Sword |

Firearms

Firearm - Rifle | A bolt-action rifle chambered in .30-06, this weapon is ideal for long-range engagements where precision and accuracy are key.
Range: 120 ft (**1d12+Accuracy**)

Type 38 Arisaka - This bolt-action rifle is the standard issue firearm for demon slayers in the Taisho era, featuring a 6.5mm caliber, a five-round internal magazine, and a bayonet lug for melee combat. (5 rounds)

Winchester Model 1895 - This lever-action rifle, chambered in .30-06 Springfield, is a favorite among demon slayers for its rapid-fire capability, ruggedness, and versatility. (4 rounds)

Mauser Karabiner 98k - This bolt-action rifle, chambered in 7.92x57mm Mauser, is a powerful and accurate weapon. (5 rounds)

Firearm - Pistol | A standard-issue sidearm for military and police use, this pistol fires a 9mm cartridge and is a reliable choice for those looking for a balance of accuracy and stopping power.
Range: 60 ft (**1d8+Accuracy**)

Mauser C96 A semi-automatic pistol that fires 7.63x25mm Mauser rounds, featuring a distinctive broomhandle grip and detachable magazine. (10 rounds)

Nambu Type 14 - A Japanese semi-automatic pistol that fires 8mm Nambu rounds, known for its smooth action and simple design. (8 rounds)

Colt M1911 - An American semi-automatic pistol that fires .45 ACP rounds, widely regarded for its reliability and stopping power. (7 rounds)

Firearms

Buying, Using, Customizing

Firing: Firing a gun in combat

requires a finesse check in order to hit targets. Players will also add their accuracy to damage rolls. When out of combat however, players should use accuracy to roll to hit.

Buying Firearms: Firearms are easily purchasable at the estate or hunting shops found in cities. These guns are usually costly but are very durable and hard to break.

Reloading Firearms: Reloading firearms takes a full action in combat. Some items may be available for certain weapons to mitigate this, such as speed loaders, but not all firearms come with this option.

Customizing Firearms:

Firearms can be given a single customization option that can change certain features or add bonuses.

Players may add further customizations later if they learn abilities such as Gunsmithing.

Regardless of the amount of customizations, they can be swapped on and off in between combat so long as players have a means to work on them.

Firearms

Ammunition and Modifications

Ammunition

Standard - Pistol Ammunition: This is a basic lead bullet that is commonly used for pistols, it offers good accuracy and decent penetration. (*Standard Pistol Damage*)

Hollow Point - Pistol Ammunition: This ammunition has a hollowed-out tip that expands upon impact, causing severe damage to soft tissue and organs.
(*Adds +3 Damage to Pistols*)

Standard - Trench Gun Ammunition: This is a basic shotgun shell with small pellets, it is useful for medium-range engagements and offers decent spread.
(*Standard Trench Gun damage*)

Dragons Breath - Trench Gun Ammunition: This shotgun shell has a magnesium-based compound that ignites on impact and creates a flash of fire, making it ideal for taking down groups of enemies.
(*Adds a stunning effect to Trench Gun damage*)

Standard - Rifle Ammunition: This is a basic lead bullet that is commonly used for rifles, it offers good accuracy and decent penetration.
(*Standard Rifle Damage*)

Firearm Modifications

Silencer: Muffles the gun's sound, reducing noise and making shots harder to detect. Firing does not reveal your position and grants a +2 bonus to Stealth checks after firing

Extended Magazine: Increases the firearm's ammo capacity, allowing for more shots before reloading. Doubles the firearm magazine size, reducing reload frequency.

Scope: Enhances long-range accuracy by providing a magnified view of distant targets. Extends the firearm's range by 50% and grants a +1 bonus to Finesse checks for aimed shots.

Bayonet: Attaches a blade to the firearm, enabling close-quarters melee attacks. Adds a melee attack option that deals 1d8 damage and uses the Strength or Finesse stat.

Stock: Stabilizes the firearm, improving accuracy and reducing recoil for precision shots. Grants a +1 bonus to Accuracy rolls and reduces penalties from firing while moving.

Auxiliary Weapons

Grenades

Type-97 Grenades: A Japanese fragmentation grenade dealing 20 damage upon detonation in a 10-foot radius.

US MK2 Grenades: A classic American pineapple grenade dealing 25 damage in a 10-foot radius.

Molotov Cocktail: An incendiary weapon dealing 1d8 fire damage per round in a 15-foot radius for 3 rounds.

Other

Flamethrower: A devastating close-range weapon that releases a cone of fire dealing 3d6 fire damage to all targets in a 20-foot cone; targets hit must make a DC 14 Finesse Check or catch fire, taking 1d6 fire damage at the start of their turn for 3 turns. (10 uses)

After-Effect Projectiles

Throwing Bombs: These small, handheld explosives are a common tool for the demon slayer corps. These bombs can be thrown as a bonus action before a strike and require a finesse check to actually ignite.

(1d4 to 10d4)

*Whenever bombs are used roll a 1d10 and add your base finesse to determine the amount of 1d4 damage rolls

Wisteria Kunai: A specialized weapon used by demon slayers, this kunai is infused with wisteria poison that can prove deadly to demons. Its sharp point and balanced weight make it a versatile tool for both close-quarters combat and throwing.

(1d6

*Inflicts Weakening Poison on a target causing 14
-1 to FORCE and FINESSE.)

Simple Projectiles & Applying Poisoning

Projectiles

Crossbow: A compact and deadly weapon favored by hunters and assassins, the crossbow fires bolts with significant force, offering a swift and lethal attack against targets. Range: 60 ft [1d12 + Accuracy]

Bow: A classic weapon used by skilled archers, the bow is a versatile tool that launches arrows with accuracy and power, allowing the wielder to strike foes from a distance. Range: 40 ft [1d8 + Accuracy]

Kunai: A versatile tool for both combat and utility purposes, the kunai is a dagger-like weapon that can be thrown with accuracy or used in hand-to-hand combat for slashing and stabbing attacks. Range: 5ft x Force [1d6 + Accuracy]

Shuriken: A nimble and stealthy weapon, the shuriken are small, star-shaped projectiles that can be thrown or used in close combat to deliver quick and precise strikes. Range: 30 ft [1d4 + Accuracy]

Using Simple Projectiles

To use these weapons as well as affect projectiles in combat, players can use Finesse to throw them or launch them, adding their accuracy in the damage roll.

Applying Poison

Poisoning is a common practice of members of the corps. The act includes coating a weapon of any kind in corps issue liquid wisteria poison. Applying poison requires an action to do and can be done to almost any weapon that has a blade or tip. Poisons come in one of two forms at the basic level.

Weakening Poison: Removes an entire level off of every base stat of the poisoned target demon.

Damaging Poison: Deals a d10 of damage every round of combat the target demon is poisoned.

Poison and Cultivation

Corps Issued Wisteria

Corps issued Wisteria Poison: Weakening - This poison is derived from the wisteria plant and mixed with other natural ingredients to create a potent toxin. When applied to a blade, it causes a mild burning sensation on contact with demon flesh and enters their bloodstream, weakening them over time

Poison Effect: *-1 to a demon's Force and Finesse every round a demon has been infected.*

Corps Issued Wisteria Poison: Damaging Poison - This potent poison is created using the same natural ingredients as the weak strength variant, but with a higher concentration of wisteria extract. When applied to a blade, it quickly spreads through the demon's bloodstream, causing intense pain and debilitating their movements as they take damage each turn.

Poison Effect: *-10% health every round to any demon infected with the poison.*

***Does not affect moon level demons*

Poison Cultivation

Poison Cultivation Kit: This kit includes all the necessary materials for creating various poisons, such as vials of different chemicals, a set of scales, and a mortar and pestle. It also comes with a detailed manual on how to properly mix and handle the substances safely.

Requires science check.

Demon Poison Remedy Kit: This kit is designed to help cure those affected by demon poisons. It includes various antidotes and medicinal herbs, as well as a set of needles and thread for closing wounds. It also comes with a small manual with detailed instructions on how to use each item in the kit to cure specific types of demon poison.

Requires medicine check.

Stacking Poison

Poisoning a demon for some slayers is only the beginning. Poisons of all kinds can stack on a demon until they're cleansed, dealing stacking amounts of damage or negative effects every single round the demon is hit with another dose.

Crafting

Crafting is a unique ability where, if the right components are found, a new item can be created. Using these items and the abilities these items are given are completely up to the discretion of the DM.

For Ex. A player creates a molotov cocktail out of a (**Sake Bottle**) and (**Cloth**) using a smarts check with a check of 6 due to two components. The DM advises that the molotovs are capable of being thrown with a distance equal to force and explode dealing 3d8 damage and setting things ablaze.

When doing a crafting check, a specific amount of components are required before the crafting can take place. The difficulty of the craft is completely based on the number of components, the larger the amount of components the harder the check will be.

# of Components	Difficulty
1	4
2	6
3	8
4	10
5	12
6	14

Medical Attention

This small guide is how to determine the wound threshold of certain attacks, the higher the damage the worse the wound.

Physical Wound Types

Grievous Wounds - 13-20 Damage

Bruised organ or broken bones.

Near-Fatal Wounds - 20+ Damage

Lost limbs or Pierced organs

Starting at Grievous wounds, players stop being able to healing up to full health. Receiving a Grievous or Near-Fatal wound removes 10% of a players total health until they receive the medical aid of a surgeon or doctor. There are several types of medical aid supplies available at multiple different locations and shops, including general stores and doctors offices. Players who receive Grievous wounds or Near-Fatal wounds need to find a location with a doctor where they can receive medical treatment. Once at aforementioned locations players can speak to kakushi or regular doctors who will perform healing treatments and even perform surgeries. When close enough to these locations players may also reach these doctors over the radio to summon them, though they may take time to travel to the desired location and will be without most tools they'd need for more intensive care.

Medical Equipment

First Aid

Bandage: A roll of sterile bandage used to wrap around minor cuts and scrapes to prevent further bleeding. Heals 1d4 points of damage. [1d4 + Medicine]

Wrapping: A thick cloth bandage used to wrap around larger wounds and cuts to promote healing. Heals 1d8 points of damage. [1d8 + Medicine]

Splint: A rigid support used to keep broken bones stabilized until they can be properly treated. Does not heal any damage, but prevents further damage from being inflicted.
[Stabilizes Broken Bones]

First Aid Kit: A comprehensive kit containing various medical supplies and equipment for treating a range of injuries and ailments. Heals 1d20 points of damage. [1d20 + Medicine]

Surgical Equipment: A specialized set of medical equipment used to perform surgery and other advanced medical procedures. Can heal all damage and restore a character to full health. Requires an incredibly high medicine check, critically failing this check can kill instantly. [Full Heal]

Medical equipment in any capacity requires a full action, unless players have unlocked the [Medical Training] reaction.

Medical Equipment

Experimental Aid

Experimental Aid

Demon Blood Syringe: A syringe filled with cured demon blood that can be used to instantly heal broken bones, lacerations and other grievous wounds. However, it comes with side effects and can only be used 3 times before causing hysterical damage like heart attacks or seizures. It *requires a medicine check* to use and takes a full turn to administer.

[Full Health Heal]

Demon Blood Jet Injector: The Demon Blood Jet Injector is a sleek and futuristic device with a metallic finish and glowing red accents, capable of administering a powerful healing dose of cured demon blood instantly with a press of a button. This device is designed to quickly and efficiently administer cured demon blood to instantly heal broken bones, lacerations and other grievous wounds. It can be used *instantly without requiring a medicine check*, but like the syringe, it can only be used 3 times before causing hysterical damage. The jet injector is more expensive than the syringe, but it allows for faster healing and requires less skill to use. **[Full Health Heal]**

Secondary Aid

Painkillers: A small white tablets that provide a temporary relief from pain and grant a small boost of health to the user when consumed, making them an essential tool for any demon slayer who needs a quick and effective way to heal themselves during battle. These small secondary aids provide an extra 1/4th of total health as a temporary bonus, the effects of which wear off after an hour and if a player has not received aid since, the damage dealt remains.

*Jet Injector being used

Transportation

Driving in game

Driving can be an exciting and convenient way to travel in the game world. Players can choose to call a Kakushi for transportation or save up their earnings from missions to purchase a car from a dealership. Once they have a car, they can use it for casual driving or to navigate through dangerous situations.

Casual Driving: When driving in normal conditions without any immediate dangers, players can make a Finesse check to determine how well they handle the vehicle. The DC of the check may vary depending on factors such as the condition of the road, weather, and visibility. If the Finesse check is successful, the player's character will navigate the vehicle safely to their intended destination.

Dangers on the Road: However, there may be times when unexpected dangers arise while driving, such as animals or humans jumping into the road, obstacles in the way, or sudden changes in traffic. In such situations, players may need to make a Reaction Time check to react quickly and avoid the danger. The DC of the Reaction Time check will depend on the severity and suddenness of the danger.

Calling for Assistance: Players who do not own a car or prefer not to drive can call a Kakushi for transportation. They can use a radio or a crow to contact a Kakushi, who will come to their location and provide transportation services.

Purchasing a Car: Players can save up their earnings from missions to purchase a car from a dealership. The cost of the car will depend on the make and model, as well as the condition of the vehicle. Players should work with the Game Master (GM) to determine the cost of the car and any additional features or bonuses it may have.

Model T Ford ¥600

Datsun Type 10 ¥1,200

Mitsubishi Model A ¥3,000 yen

Remember to consult with your GM for any specific rules or guidelines on driving in your game world, and always prioritize safety and caution while operating a vehicle. Happy driving!

Transportation

Model T Ford

Description: A classic American car known for its durability and affordability. It has a black exterior with wooden spokes on the wheels and a spacious interior.

Bonus: +1 to Dexterity checks due to its reliable engineering.

Cost: Approximately 600 yen, which is equivalent to around 20,000 yen in 1934.

Datsun Type 10

Description: A small Japanese car produced by the Datsun Motor Company, known for its sleek design and smooth handling. It has a dark blue exterior with a streamlined shape.

Bonus: +2 to Dexterity checks due to its nimble maneuverability.

Cost: Approximately 1,200 yen, which is equivalent to around 40,000 yen in 1934.

Mitsubishi Model A

Description: A luxury car produced by the Mitsubishi Motors Corporation, known for its elegant appearance and advanced features. It has a black and silver exterior with leather seats and polished wood trim.

Bonus: +1 to all Vehicle checks due to its advanced engineering and comfort.

Cost: Approximately 3,000 yen, which is equivalent to around 100,000 yen in 1934.

Clothe provide instant camouflage for appropriate situations. Players can only be caught if NPC's make a successful insight check, or outed.

Clothes

Clothes [Civilian]

Civilian Clothing: Simple and practical clothing worn by common people for everyday use, designed for comfort and durability.

Elegant Clothing: Luxurious and refined clothing made from high-quality materials, suitable for formal events and special occasions.

Flashy Clothing: Bold and eye-catching clothing designed to make a statement, often adorned with bright colors, intricate patterns, and decorative accessories.

Sleepwear Clothing: Comfortable and cozy clothing worn for sleeping or lounging around the house, designed for maximum comfort and relaxation.

Farming Clothing: Durable and functional clothing designed for working on a farm, featuring sturdy fabrics and reinforced stitching to withstand the rigors of manual labor.

Clothes [Unique]

Demon Slayer Uniform: A specialized uniform worn by members of the Demon Slayer Corps, made from a special material that can withstand the acidic blood of demons. Provides +1 to AC

Police Uniform: A standard uniform worn by members of law enforcement, designed for durability and utility. Provides a bonus +1 to intimidation to interrogate suspects, and grants access to police resources and information.

Guard Uniform: A uniform worn by guards and security personnel, designed for protection and defense. Provides access to fortified locations and secure facilities.

Performers Uniform: A flashy and elaborate uniform worn by performers and entertainers, designed to captivate and entertain an audience. Grants access to backstage areas and exclusive events.

Food

These meals can be purchased at restaurants or food carts throughout the game world, and may be preferred by certain NPCs or characters. Eating the right meal at the right time could provide a small bonus to stamina, which could be crucial during intense battles or other challenging situations.

Example Bonus Dishes

Adds temporary usable stamina that disappears when used.

+10 Bonus Stamina

Ramen: A popular Japanese noodle soup dish, often served with meat or vegetables.

Tonkotsu Ramen: A rich and creamy pork-based broth, often served with thin noodles and toppings such as sliced pork, green onions, and soft-boiled eggs.

Miso Ramen: A hearty and savory broth made with fermented soybean paste, often served with thicker noodles and toppings such as ground pork, bean sprouts, and corn.

Tsukemen: A type of ramen in which the noodles are served separate from the broth, which is thick and often served cold. The noodles are dipped into the broth before eating, and toppings can include sliced pork, green onions, and seaweed.

+5 Bonus Stamina

Sushi: A dish consisting of vinegared rice and various toppings such as raw fish or vegetables.

Nigiri Sushi: Traditional sushi consisting of a small ball of rice topped with a slice of raw fish or other seafood.

Maki Sushi: Rolled sushi, often with a seaweed wrap, filled with rice, vegetables, and/or raw fish or other seafood.

Temaki Sushi: A type of hand-rolled sushi that is cone-shaped and filled with rice, vegetables, and/or raw fish or other seafood.

Example Recovery Dishes

Refills missing stamina, but gives no bonus.

+10 Stamina

Bento Box: A boxed lunch typically containing rice, meat or fish, and vegetables, which can provide a small boost to stamina. This is the only meal option that can be carried and eaten later, as it is designed to be portable.

Curry Rice: A dish consisting of Japanese rice and curry sauce, often served with meat or vegetables.

Yakitori: Grilled chicken skewers, often seasoned with soy sauce or other seasonings.

Donburi: A Japanese rice bowl dish, often topped with meat, seafood, or vegetables.

Snacks

These snacks can be consumed for no benefit, or given to NPCs to improve their mood or further relationships with them. Some NPCs may have particular preferences or favorites among these snacks, and offering them the right snack at the right time could earn the player additional favor or rewards.

Sweets

Dango: A type of Japanese sweet dumpling made from mochi (glutinous rice flour) and typically served on skewers in groups of three or four.

Cost: 4 Yen

Manju: A traditional Japanese confectionery made from sweet bean paste wrapped in a flour dough.

Cost: 5 Yen

Senbei: A type of Japanese rice cracker, typically flavored with soy sauce or other seasonings.

Cost: 3 Yen

Common Street Food

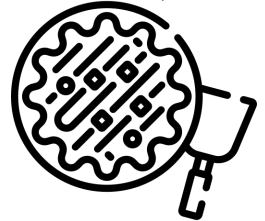

Taiyaki: A fish-shaped cake traditionally filled with sweet red bean paste, but also available with other fillings such as chocolate or custard.

Cost: 8 Yen

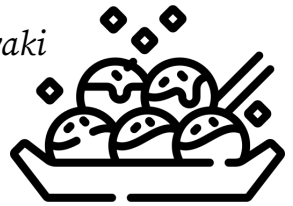

Okonomiyaki: A savory pancake made with flour, eggs, and shredded cabbage, topped with meat or seafood, sauce, and mayonnaise.

Cost: 10 Yen

Takoyaki: Small balls of batter filled with octopus, green onion, and pickled ginger, typically served with a savory sauce and mayonnaise.

Cost: 10 Yen for 6 Takoyaki

Death

In no uncertain terms, death is unfair. As has been stated before, this system revels in amplifying the core tenets the Kimetsu no Yaiba series, a series where these heroes are no stranger to loss.

Dying in this system is easy, easier than living that is, and can happen suddenly. Losing all of your HP means you have lost enough blood, enough air, enough *will*, that your body cannot contain the soul inside it. When you reach 0 HP, you may save, immortalize or shred your sheet, because you are dead.

Certain abilities, medicines and items can stop you from going below 1 health for a time, but without any immediate care, you are dead. Of course this can change if your DM finds the heart to allow it!

"Growing old and dying is what gives meaning and beauty to the fleeting span of a human life. It's precisely because we age and die that our lives have value and nobility. Strength is not a word that means much in regard to the flesh."

Rengoku Kyojuro

Breathe and Live 1934 Information Compendium

The State of the Demon Slayer Corp

Demon Slayer SPOILERS beyond this text, please be aware.

The time is 1934 and some time has passed beyond the death of Muzan Kibutsuji. With this, the Demon Slayer estate has taken a careful rest during this time of peace.

Though not less than 10 years after his death demons have begun to pop up here and again for some reason. Now, not as wealthy as before, the Ubuyashiki family has once again taken up the mantle of the protectors of Japan. They called upon as many slayers as they could to return fire against the demons and their new leader, though it feels like a fruitless venture, demons hiding even more cleverly than before. That is until the players arrive. The now leader of the Corps, Kaisho Ubuyashiki, a 17 year old prodigy even amongst the family's history, commands the frontlines. 10 Hashira stand as his last line of defense, spread thin amongst the ever expanding demon forces.

Swordsman and Kakushi

Since the defeat of Muzan Kibutsuji, the Demon Slayers have continued their valiant fight against demons, carrying on their legacy of protecting humanity from the dark forces that lurk in the shadows. With access to radios and the latest technological advancements of the 20s and 30s, Slayers now have enhanced communication and tools at their disposal to aid them in their mission. As the world evolves, so do the roles of the Kakushi. No longer limited to just reconnaissance and information gathering, Kakushi now take on additional responsibilities. They serve as drivers, maneuvering cars, planes, and ships to transport Demon Slayers to different locations swiftly. They also practice advanced medical techniques, tending to the injured and conducting research to develop new technologies that can aid in the fight against demons.

With new inventions and scientific discoveries, the Demon Slayer Corps has adapted and integrated modern techniques and tools into their ancient practices. However, the threat of demons is still ever-present, and Demon Slayers and Kakushi alike must constantly hone their skills, utilize their resources, and work together to protect humanity from the darkness that seeks to consume it. The fight against demons continues, and the Demon Slayer Corps stands strong in their unwavering dedication to safeguarding humanity from the demonic menace.

New Demon Era

Demons have long since plagued humanity and after the destruction of Muzan Kibutsuji it was finally thought to be over. However through some hellish means, evil prevailed. Now again demons have begun popping up to rend hope from the arms of the living, taking a drastically different approach than before. The leader of the demon armies is unknown to the Demon Slayer Corps, though her 12 commanders make a great effort to show themselves whenever Hashira decide to take on missions. These 12 commanders do reclaim the mantals of “moons” though not in any ordered power structure. No, not this time around, instead they take prefixes with their most identifiable feature, assumedly named by their master. These names have traveled through ears of demons and humans alike and all 12 have been at least comfortably identified.

All of the demon commanders make up what the Corps now calls “The Tree of Evil” with all their sects compiling the trees “roots” or “branches”. The new mission of this generations Demon Slayer Corps is to uproot this tree for good.

50	16				
Power	Finesse	Fortitude	Speed	Smarts	Social
6	8	7	6	8	4
Attacks			Reaction points		
Bite: 1d4+3 Claw: 4 BDA:			9		

Health	AC	LM: Disciple Demon			
80	18				
Power	Finesse	Fortitude	Speed	Smarts	Social
8	10	9	8	10	6
Attacks			Reaction points		
Bite: 1d6+4 Claw: 5-8 BDA: 1d8+4			14		

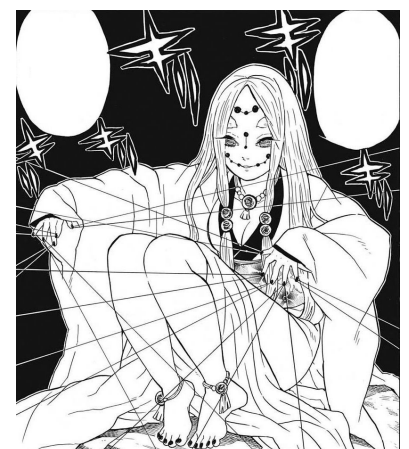

Halved Damage Addition

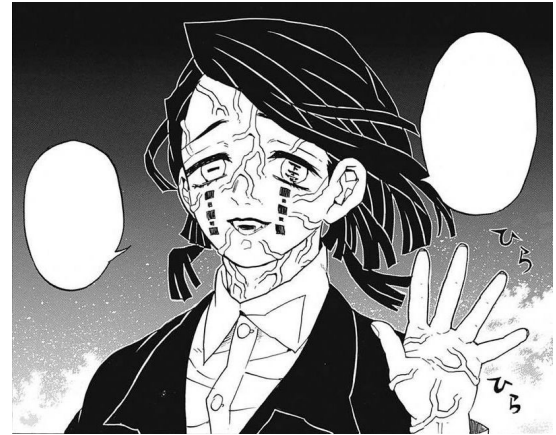

When adding Power & Finesse to attacks, demons add half of total instead of the -1 from base

Differing Reaction points

Reaction points are calculated normally, though halved after.

Health	AC	Lower Moon			
200	20				
Power	Finesse	Fortitude	Speed	Smarts	Social
12	14	11	10	13	9
Attacks			Reaction points		
Bite: 1d8+6 Claw: 7-11 BDA: 1d12+6			25		

Health	AC	Upper Moon Disciple			
350	25				
Power	Finesse	Fortitude	Speed	Smarts	Social
Attacks			Reaction points		
			32		

Health	AC	Upper Moon			
600	30				
Power	Finesse	Fortitude	Speed	Smarts	Social
Attacks			Reaction points		
			50		

The Ocean Hashira

Yosuke Wōkuo

Health: 100
Stamina: 120
Reaction Points: 25
Skills:

Force: 9 Finesse: 13 Fortitude: 7 Speed: 12 Social: 4 Smarts: 8

Attacks

Basic Slash: (+9/+12) to hit, 7d6 + (+9/+12)
